

We have had placed in our hands for sale the herbarium of Mosses of Prof. Clara E. Cummings.

The specimens are enclosed in envelopes, mounted on 1777 sheets, half the standard size. The collection contains 3807 specimens, representing 2000 species and over 200 genera. It includes complete sets of Husnot's Musci Galliae, 850 specimens, which cost \$7.50 per 100, Musci Fendleriani Venezuelenses, 150 specimens, which cost \$10.00 per 100 unmounted, and Macoun's Canadian Musci, 525 specimens, which cost \$8.00 per 100 unmounted.

We offer the complete herbarium, all mounted, for \$275. This price is equivalent to \$7.20 per 100.

CAMBRIDGE, MASS., Dec. 11, 1908

Mr. Geo. G. Kennedy,  
Readville, Mass.,

My dear Sir:-

We can supply you with Mycologists Envelopes if these are the kind of pockets you desire. We are unable to make the Gray Herbarium Pattern. Kindly let us know the size and number you will want and we will be pleased to quote you prices.

Do you use genus covers and mounting paper now? We have not had the pleasure of registering your order for the same for some time.

Trusting that you will favor us with the order and assuring you of our best attention, we beg to remain

Very truly yours,

CAMBRIDGE BOTANICAL SUPPLY CO.

Dr. Geo. G. Kennedy,  
Readville, Mass.,

My dear Sir:-

We regret to inform you that we are unable to supply you with Herbarium Pockets, Gray Herbarium as the company who made those failed some time ago.

In regard to the Mounting Paper we can supply you with paper weighing about 24 lbs. to the ream for 5.00 per ream. This is exactly the same quality as our Gray Herbarium Paper. We trust that you will favor us with your order and we can assure you the same will go forward promptly.

Thanking you for the inquiry, we beg to remain

Very truly yours,

Dear Sir,

We have received from Dr. F. Camus of Paris  
a parcel containing "Musci boreali Americani" and  
he asks us to pay him for it (400 frs) on your account  
Will you please let us know, whether you wish the  
payment to be made by us and also as to the way  
in which you wish the parcel to be forwarded?

If you have not already the supplement des-  
cribing some of these specimens, we can supply it:

Sullivant (W) Icones muscorum or figures and  
descriptions of most of those mosses  
peculiar to North America, which have not  
yet been figured. Supplement, 81 plates,  
imp. 8vo, cloth, 1874, — £1.10s.

Awaiting favour of reply

Yours respectfully

E. Carleton,

Anhurndale. Oct 22. 1872.

Professor Goodale-

My Dear Sir:

I enclose a note  
from S. B. Nickerson showing  
that partly unjust in itself.  
I hoped we would bring out  
a better edition of his  
check-list. I believe such  
a one would sell much better  
than the old one. Many  
more people are ornithologists  
and the whole subject has  
revived interest. I had not  
decided to publish one, but  
somebody ought to do so.

Yours truly  
Geo. S. Chandler

CLEVELAND HOUSE

July 24:17

Dear George:

I suppose you were at the Class Supper. I thought of you, anyway, as being in your accustomed seat. I wish I might have been there, but I had to come to my summer home June 11th. I saw by some paper that there were only ten of the class of '64. I wish you would drop me a line telling me a little about the Supper. It would interest me, and under similar circumstances I would gladly do the same for you.

Your old friend  
and classmate  
Hiram P. Chandler.

Nov 1911

My dear Mr. Kennedy; -

I was very much pleased to receive those stamps. The old locomotive stamp has always been a favorite with collectors, and though not new to me was good enough to make a replacement specimen. All of the recent ones were new to me. I have long tried to get a Cook Islands stamp by gift or exchange and was delighted to find one among those you sent.

Sincerely  
Austin W. Cheever

I have known Dr Cheever  
from childhood

a young man  
of excellent character  
and attainments.

He has the Harvard  
Degrees of ~~Doc~~

Bachelor of Arts  
and Doctor of Medicine  
and I think he is  
well qualified for the  
position of a Local  
Medical Examiner  
for a Life Insurance  
Company. GCK

July 29. 1915.

1050 Tremont Building,  
Boston, Mass.

## Membership Committee.

May 11, 1914  
DEAR Dr. Kennedy:

Will you kindly furnish the Membership Committee with such information as will enable it to judge intelligently of the qualifications of

Dr. Clarence A. Cheever  
whom you have proposed for membership in the Club.

The Committee desires especially to know the candidate's occupation or chief interest, reputation and character, and any evidence of interest in the work and activities of the Club. It is also important that every candidate should have signified a definite desire to become a member of the Club.

Members are requested not to nominate members of their own family; and two members of the same family are requested not to join in nominating any candidate.

Sincerely yours,

R. B. Lawrence  
Chairman.

52 Hartford St  
Dorchester

Dr. Kennedy

Dear Sir

Will you kindly  
tell me on the enclosed postal  
if you found the *polytrichum*  
from Waltham to be a new  
one? Is it not the *juniperinum*?  
Did I understand that the  
*Catharinaea* you found in the  
bog was the *undulata* with  
narrow costa?

I have never seen the  
angustata. Mr. Gerritson  
said that ~~the one~~ <sup>one</sup> found near  
Maine it was the angustata.  
I am going to ask him  
to send me a specimen  
to see if the costa is as wide  
as Grout says. (I did not gather it then.)  
Hoping to hear from you

I remain

Cordially yours

Ida Blapp.

WILLIAM L. PRATHER LL.D.  
PRESIDENT

AUSTIN, TEXAS ,

March 22, 1907.

My Dear Mr Kennedy:

I have this day mailed to your address as follows--  
" Mr Kennedy, Needville, Mass, Suburb of Boston," several packages of  
flower seeds tied up in a single bundle. Your letter, from which I might  
have obtained your address with certainty, has been mislaid and so I must  
guess again. I trust, however, that the package will reach you in good  
condition.

I hope you will get something worth having out of the lot.  
It would give me very great pleasure to visit again your beautiful home  
and meet again yourself, your charming wife, and your lovely daughter.

I still remember vividly the claret punch, the wee drap whiskey, the  
ride behind your flyers, and all the other wholehearted hospitality  
which you displayed towards an utter stranger. It is not probable that  
we shall meet again; but my acquaintance with you was one of the happi-  
est incidents of a trip which made a joyous epoch in my life.

Present me cordially to Mrs Kennedy and to your daughter, and  
believe me,

Very Sincerely yours,

James B. Clark,

ans  
July 11-

Coolidge Point,  
Majorsville, Mass.

July 7, '07.

My dear Dr. Kennedy,

are the "Bryum man" are not  
you? You answered my query  
once about a red Bryum in  
the Fells.

Last summer Mrs. Stevens  
and I wrestled with some species  
but she told me before that  
they were certain all to be Pöhlia  
nutans, no matter what they  
looked like — how different to  
each other! "Except those that are  
Bryum coespiticiium." I suggested,  
producing divers envelopes, with  
sundry dates and localities  
inscribed on them.

Alas! she proved a true prophet!  
P. nutans! P. nutans! P. nutans!  
But this year I find one

This appears to be a  
*P. nutans*: the one  
I ex. was synoicus  
the peristome  
matched the Bay Ear  
figure & did not  
agree with ~~the~~ ~~the~~  
figure 50 of *Secur*  
Sullivant.

that I tremblingly venture to think  
may be *P. securii*!  
Is it?

I enclose some in envelope  
with date and diagnosis -

I have two other, gathering, one  
by our back steps, immature; and  
one on a tussock in a pool - but  
I have not studied them yet.  
Still, I cannot think them *P.*  
*nutans*, at all events.

I want to get all the species  
I can, to make more complete  
the set I am preparing for the  
Mass. Hort. Soc (and have been  
preparing for four years, at the  
very least!)

Respectfully  
Cora H. Clarke.

Anna E. Cobb

and still <sup>loves</sup>

One who loved Willoughby and its  
birds and flowers.

P.S. There was quite an extended notice  
of Mrs. R's death &c. in the "Vermont  
Union-Journal" published at Syn-  
donville Nov. 20.

322 Broadway,  
Prov. Dec. 8, 1907

Dear Mr. and Mrs. Kennedy, If you

have not already been informed,  
you may be interested to know  
that - Mrs. Richardson of Wil-  
loughby died at the Waterbury,  
Vt. Asylum, Sat. Nov. 16, and  
was buried at Willoughby the  
next Tues. under the birch tree  
near Mr. Cheney's gate, beside  
Mr. Richardson and their little  
girl.

Roy Cheney, the oldest son in  
the Cheney family was at the  
funeral, and of the friends pres-  
ent was the only one who stayed

over night with Will.

Will's divorced wife and little son were there among others, but none of the Tapley family, who have been there several years in winter as well as summer were present at the funeral.

Dear Mrs. R - I am glad her troubles are over - she did so much for my comfort and pleasure - I shall never forget her kindness. May she have peace and rest.

Possibly you have not heard of the death of Mr. Carleton, whom you met with Mr. Torrey at the Mt. Lafayette House in Sept. 1906.

He died at his home in Prov. Nov. 15, the day before Mrs. R'n passed away.

When he came from Bethlehem about the middle of Sept. he was ill, and tho' he had already planned to go to Florida in Nov. it was <sup>not</sup> so to be, for by that time he had passed away.

While Mr. Carleton was in Bethlehem he wrote me that - Mr. Torrey was suffering from rheumatism. I hope by this time he has fully recovered, and will live long to write about the birds, and the beauties of the Outdoor World. Please remember me to him with kind wishes for his recovery, when you next see him.

Hoping Mrs. Kennedy and yourself are well, also Mrs. Kennedy's sister whom I have met at Willoughby, I remain

EAST DORSET, VT., 25 December 1907

My dear Mr Kennedy -

To send coals to Newcastle is one thing - to send coals to a man in Newcastle who needs them is another. To no one could the map be more useful than to me. Among many kind remembrances received today there is none I prize more than this. I know, too, that it took four of those <sup>survey</sup> maps joining by corners to make the map of this region. So I am especially appreciative of the trouble

and thoughtfulness it represents. The family  
join me in returning + multiplying your  
Christmas wishes.

We have found three more  
cork chums; two in one place a mile  
north-east of the one I climbed (?), and  
another about ~~one~~ <sup>two</sup> miles south east on the  
Barnumville road. Referring to your map you'll  
see where this is.

If you come this way  
another summer I wish you might come  
here for a stay. Be sure to hail us if you  
go by, anyhow. We shall always be glad to  
see you or yours. Happy New Year! Sincerely

JOHN I. COCHRANE, M. D.

EAST DORSET, VT., \_\_\_\_\_ 190

Dear Doctor Kennedy:

Some years ago I gave you a photograph which I remember you or Mrs. Kennedy said was "pretty", but didn't look like me. I am sending you one that I believe is a fair likeness, though taken in my own home and not by a professional. Should you ever come across the "pretty" one, I hope you will destroy it.

With kind regards

from us all to you  
and yours, I remain

Sincerely yours,

Annie L. Colgate

92 Glen St.

Somerville,

December 15.

338 Merrick Avenue  
Detroit-Mich Jan. 2<sup>nd</sup> 1914.

My dear, Kennedy,

I have just received the class report for this year and am much interested in your life work. It is just what I hoped to be able to do in these my latter years. Had I known some other of the illusive fortunes which have come just in my grasp, only to be dissipated by some adverse influence outside of my self, like deaths of my father; the panic of 1907; the plague and revolution in China; or my own troubles which kept me on a salary of \$600, when I had offered of from \$1200 to 6000 a year, five year engagements to build smelting plants in other countries. I made a lovely wild trip of six weeks through the Sierran mountains of central Mexico for the latter people, Alaska, Canada and the interior of Colombia & A. I have only added to my store of flowers. In the U.S. there is one trip you ought to make with me, and that is the Grand Gulch district of S.E. Nevada and N.W. Arizona for the botany has not been written up, and we could add a list of new plants to our glory. I made two trips, about 225 miles from the R.R. there, but I think the R.R. is 45 miles nearer now. It is when the mountains come down to the plains below the Grand Divisions of the

to undertake such a trip either with children  
the ladies I can give you a more detailed  
expense account than this part, though.

It may look like a wild dream to you  
but I am so used to starting off at a woman's  
word and going anywhere that it is only  
a matter of funds to me. As all my daughter-  
in-laws family and our husband have planned  
to go to San Francisco for the Panama Exposition  
we wanted to go too but so far see no possibility  
of the funds this year.

By working myself into a sort of "Kennedy  
Edmund Foundation," the fashion now with  
rich men, I could use my experience to give  
you a fine trip though a rough one in part and  
also make the desired family trip before we  
reached home. The way I do sometimes I buy  
the horses for the trip and sell them when through.  
I lose anything it is cheaper than renting  
anyway. I thought we could do this with a Ford  
to advantage. Take a flower press with you and  
you would come back with material enough to  
keep your clubs talking if you live to be 90.

On freight trains go into this country so we  
could arrange for a gasoline supply at the  
likely points. We would have to make plans  
over to make all the parts of the trip at the  
right time.

Wishing you and yours a happy New Year  
and many of them I am yours sincerely  
W. W. Curtis

4 Colorado Two of us made the trip in a light-  
mountain wagon and through the mires  
on the way said we would never get through  
and the two men we took with us wanted  
us to turn back several times, we kept on and  
reached the river without the least trouble.

I don't think you have any idea of  
the quantity and beauty of the flora in  
April and May. If you have been to Cal  
from San Diego to Fresno from Feb to June  
you would begin to get a little idea of it  
what it might be like. I had no time to do  
any botanical work, hence my longing to  
get back and take it slowly. I was sent  
through to see what the new discoveries promised  
and whether I could get a railroad through  
and a water power for a furnace plant.

I figured a \$20,000 fee was as good as made  
but the copper panic of 1907 stopped it all for  
clints and myself. Nothing has been done since  
except last year the U.S. Geological Survey had  
a road through there.

I think you and I could make the trip in  
a "Ford" because it is light and has a fine  
engine. One man horse back to get aid in case  
of accident and a chauffeur who could cook <sup>if needed</sup>.  
Food would have to be light and plain and  
the ground your bed but if you can rough it  
I can make the trip not too hard for anyone  
with grit and a love of nature.

My trips cost me about \$60 each  
from the R.R. at Porcupine, Salt Lake  
and San Pedro R.R. a very interesting.

I take personal charge of the Tin mine at  
Gaffney, S.C. for English tin men who  
have been following in the development  
and production, which has been under my  
direction for the past eighteen months.

The Town and nearly all new to me in  
this great Cotton belt. The wooded ravines,  
through which all the brooks in the Sapphite  
run, are rich in witnessing material for  
my study, though well known through publication.

The war has stopped the English, possibility  
of equipment, and my clients through producing  
about twice their visible expenses are too poor  
to put on the necessary machinery, costing  
\$20,000 for preliminary production which  
increases the value of all spent as shown by our  
boying, but whether these veins will open up  
to supply large works, cost over \$20,000 as the  
probable we are supposed to work out. I want  
them to make a report condemning the whole  
enterprise from head to tail, but I feel the con-  
dition so different, and promising, that I shall  
go on without immediate cashing to help the work  
along. Because if demonstrated, the supply is  
very much needed in the U.S. and if once  
demonstrated commercial it means a great gain  
for the South as well as operators.

I hope your health is good as the years  
advance and a weekly lot of 10,000 miles would  
not be appalling to you. My estimates are always  
high enough to cover every possibility.

I have the detailed expense of almost every  
trip I have made, so that if you really like

Good to the coast.

B. This would be my idea of a trip and take in all this years opportunities.

Take your daughter and I Mrs Currier who is a <sup>very</sup> young old lady. Start San Francisco New York to Panama (9 months California Exposition rates). Through Canada to San Diego, see their show, leaving the ladies at the Commodore Hotel, San Diego, while you and I go to Moapa, where we would have auto & men meet us and where we can get supplies.

We might be gone a month. Middle of August start north from San Diego for Los Angeles Santa Catalina, and a month there abouts reach there in May, just the time for the Yosemite; reach Seattle in June; cross Victoria and home by the Canadian Pacific.

We could stop over and see the Yellowstone park and we come home, unless you wanted to take in Alaska first.

Your through ticket will cover all the route I have made it all <sup>but part of Yosemite</sup> and my wife and but-  
Hester and I only of Los Angeles.

A might cost \$300.00 to \$500.00 for the round trip, but you would have something to talk and study about, the rest of your life.

Our expenses would have to be paid with a small advance for outfit unless I have luck in collecting in some few days and which are held up, unexpectedly, result of war, poverty and partly misfortune of my clients.

I started to write to you to say that  
my daughter was married Dec-<sup>1st</sup> and as  
one of the ~~State~~ <sup>Massachusetts</sup> ~~State~~ <sup>State</sup> ~~Committee~~ <sup>men</sup> (I  
sent you one <sup>which</sup> was returned to my  
daughter in law's house where the wedding was  
held, or never reaching you, but as I did  
not see the envelope I do not know what  
William Charles put in it. I thought Reading  
was your & D. address, so I am sending  
this to Richardson's care, for perhaps you  
are spending this winter elsewhere.

I intended to have sent announcements  
to all friends and acquaintances, of personal  
acquaintance, but the young people decided  
to cut that out for most of their friends live  
in the City which gave them quite a large  
wedding, and a very pretty one, through the  
kindness of my daughter-in-law and her sister  
who live in a double house of their own that  
can be thrown together for a party that over-  
flows either. I did not know whether the  
class report went beyond the second generation  
but I see it does not. I meant the official notice.

I see you have been quite a traveller too  
for 40 odd years I averaged 20,000 miles a  
year but less since the panic of 1907 and  
only 16,000 last year.

I spent five weeks in North Carolina the  
summer of 1913, and hoped I might leave to

Mariposa, Cal., May 12 1904

Dr. Geo. J. Kennedy  
Readville Mass

Dear Sir

Replying to your letter of  
late date it would give me great  
pleasure to be able to comply with  
your request with regard to *Listera*  
*curviculata* in connection with Willoughby.  
Unfortunately, I no longer have  
any of my Willoughby collections. I  
disposed of all my Eastern speci-  
mens when and since I came here  
and since have limited my collections  
and herbarium to plants of the Pacific  
slope with only a few Eastern plants  
for comparison. I never saw any  
form of *Listera* in the immediate neighbor-  
hood of Willoughby and never saw any  
form that I had any hesitation in referring  
either to *L. curvata* or *L. Canadensis*.

In fact, I have never known *L. aariculata* in any form. It has been recognized as a new species long after I left the East. I would be much obliged for a brief statement of the distinctions. I might come upon it on the northward where I expect to pass the hot season. *Cuvallarinides* gets as far south as the Shasta region while *L. cordata* is so far I think limited to Oregon.

I visited Willoughby a good many times at various seasons from June to October and have a good collection of my discoveries there. In a few days, I will prepare a list of them as well as I can from memory and forward you  
Very truly, Yours  
J. M. Cougdon.

My dear Sir:

Your subscription to the

Botanical Gazette for 1886 has been received.

In reference to back numbers. I can furnish you the Gazette complete up to January '85 (9 volumes), for \$8.00. Some of the numbers are about exhausted, & I doubt whether we can promise full sets very long.

Yrs very truly

John M. Coulter

The University of Chicago

Department of Botany

The Botanical Gazette

November 1, 1900.

My dear Mr. Koenig:-

I have just received your letter which gives a list of  
Florin's work. I read it with great interest when it appeared in *Chodora*,  
and will prize this special copy very much. It seems to me that the  
portrait is a remarkably good one and well executed.

Yours sincerely,

John M. Coulter

Mr. George V. Koenig,

Amherst, Mass.

The University of Chicago

Armstrong, Iowa.  
Dec. 15, 1904.

Dr. Geo. G. Kennedy,  
Readville, Mass.  
Dear Sir,

In a recent  
issue of "Science" Dr.  
Chas. E. Bessey reviews  
"The Willoughby Flora" and  
my recent paper "The  
Flora of Emmet County, Ia."

Have you a copy of  
your paper that  
you could spare  
me in exchange for  
mine. I would  
like very much to

Armstrong, Ga.  
Dec. 27, '04.

My dear Dr. Kennedy, -

I thank you  
very much for your  
"Willoughby Flora." It  
is a surprise to me  
in some ways, espec-  
ially in the number  
of species of the genus  
*Carex* common to  
these two widely dis-  
tant localities, so dif-  
ferent topographically  
and geologically. I  
was especially sur-  
prised to find you  
had *Carex* bebbii.

and Sagittaria arifolia. The latter is our most common arrow-head. My list of vascular Cryptogams will likely be a surprise to you, from its poverty of species.

If your exchange we might be able to furnish each other some interesting things. There are a few names on my list that should be changed as we have so many synonyms here, as for instance Achilleia millefolium of Gray's

manual, the plant  
 we have proving to  
 be, A. lanulosa Nutt.  
 from the west, while  
 you likely have the  
 former. I have  
 some dozen more  
 species, the result  
 of last years work,  
 to add, including  
 the interesting Brach-  
yactis angustis (Lindl.)  
 Britton. - new to Iowa.

I send under sep-  
 arate cover, a copy  
 of my Emmet County  
Flora.

Very sincerely  
 R. J. Grath.  
 S H D

Dear Dr. Kennedy,-

Truer and I  
want you to know how very much  
we appreciate the beautiful books  
which came a day or two ago. It is  
a pleasure to receive such a  
very thoughtful gift, and  
we shall have you to thank

for many delightful hours  
in the future in reading  
them and studying the pictures.  
I don't think you could have  
known anything which would  
have pleased us more, and  
we are truly grateful.

I hope very soon to have  
the pleasure of thanking you

in person, and we should be most  
pleased if you would come and see us.  
Very cordially,

Sellie Ward Crawford.

Monday.

From your friend  
Cecilia A. Crocker

"Mile-stones fair on the road of life  
Thy birthdays bright appear—  
One by one, erect and clear,  
Triumphant and with meaning life.  
Lead on, O birthdays of my friend  
With joy and peace between!  
And be ye guides and monuments  
Of all that he hath been  
And all he is and yet shall be  
Through time and blest eternity."

October 16<sup>th</sup> 1915

Dr. George G. Kennedy,

Dear Sir -- I am very sorry  
I was not at home when you  
called. I did not think to tell  
you Saturday that I should be  
obliged to go to Rockland to-day  
on urgent business. I shall  
remain at home now, if possible,  
hoping you may be able to call  
again. Please express my regards  
to the lady who accompanied you.

I have found the maiden-hair  
fern I spoke of. There are two  
fronds the size of the one you  
saw, and two about four or five  
inches across.

Very truly,

Alice L. Cressett

Monday, September 15.

WELLESLEY COLLEGE,  
WELLESLEY, MASSACHUSETTS.

Oct-18. 1904.

Mr. Geo. E. Kennedy,  
Readville, Mass.:

My dear Mr. Kennedy:

I was very glad to receive a  
copy of your Flora of Willoughby, Vt.  
which I have enjoyed reading in  
Rhodora. I think that it may be my  
good fortune to be able to go there  
some day.

I was so ill last spring that  
I had to give up all work and  
have been enjoying the autumn days  
up here in the mts. of New Hamp-  
shire. If I am strong enough to

have I hope to go to Jamaica this  
winter -

Very truly yours.

Oliver E. Cummings.

No. Woodstock: N. H. ....

HENRY W. CUNNINGHAM,

58 FISKE BUILDING,

89 STATE STREET.

BOSTON,

Manchester

Saturday May 26/06

Dear Dr. Kennedy

Dr. Hayward & I are going to impose once more upon your good nature and neighborly kindness for we have named you as one of the appraisers of Roland's Estate.

The other two are George E. Bullard, and Henry P. Quincy, Roland's Uncle and Cousin, both of whom are of Quinn Bros & Co 60 State St.

all the papers are with them and some day at your convenience when you are in Boston, will you have the kindness to drop into their office and talk with them. The whole thing is

very simple and will not take long.

The property consists of—

(1) an undivided half interest in the Milton place.

May owns the other half and receives this half by Roland's will.

(2) all the animals, carriages, furniture &c &c. in Milton.

They are not of great value & May already owned a half interest in some of the things.

(3) Various bonds & Stocks.

(4) entire collection of beetles.

These have already gone to the Museum of Comparative Zoology at Harvard.

(5) works (books & pamphlets) on Entomology.

HENRY W. CUNNINGHAM,

58 FISKE BUILDING,

89 STATE STREET.

2

BOSTON,

Of these last (5) the Boston Society of Natural History is to have such as are lacking in their library (and they have already picked them out, and laid them on the desk in Roland's den) and the balance of such works go to the Milton Public Library.

As there is no State or other inheritance tax on any of these things, the value put on them does not matter except to give Roland all the credit he deserves for the value of his beetles.

and his books.

Samuel Henshaw the Curator  
of the Museum said he would  
assist you in any way to  
value these things - You can  
reach him at the Museum  
by letter or over the Harvard  
College telephone, though you may  
have to call twice, as he may  
elsewhere at the Museum and  
not at his desk.

We all thank you much for  
all you may do for us, and  
May says "Give him my love  
& congratulations on young Gordon."

Dr. Hayward & his family are at  
the Milton house for a week's  
stay.

With kind regards believe me,  
Very truly  
Henry W. Cunningham

351 MARLBOROUGH STREET.

Mar. 17. 1868

Dear Dr. Manning

It is very kind of  
you to think of me and  
May and I will enjoy  
much taking tea with the  
Harvard family. I hope  
that you and yours are well,  
and in about a month and  
a half we shall be with you.

Very sincerely

Henry W. Cunningham

OFFICE OF  
A. & J. R. CHURCHILL,  
LAWYERS,  
No. 82 DEVONSHIRE STREET, ROOM 12.

Dear Sir -

BOSTON,

Sept. 11 1890

If the weather is good  
I will try to go to Readville  
by the 12.25 train next Satur-  
day, N. Y. & N. E. R. R. If con-  
venient to you I will go to your  
house for lunch, as you kind-  
ly suggest in your note, but  
you will please pardon the  
boating or botanizing costume  
which I must wear, and  
which you know is more  
useful and durable than orn-  
amental - If the office here  
will allow, it is possible (but not  
probable) that I may take the ear-  
lier train, at 11 a.m. If I do, I  
will not loose for you at the station  
but will walk over to your house

Thank you for the invitation to tea also, but I think I had better go home by the 6.22 train to Bird St.

I hope my uncertainty about the train will not put you to any inconvenience, and that we may have good weather and perhaps get Bidens Beckii, + Sagittaria natans var. gracillima in fruit - tho' the latter is very doubtful I suppose —

Yours very truly —  
S. R. Churchill

collected May 27, 1884

I have just written a post-  
card to Mr. Deane yesterday  
concerning *Corax*, which I think is *C.*  
*limosa*, as the scale is much  
shorter & broader than my  
Hermit Lake & Grand Mound  
specimens, which are just alike  
& which I think are *C. Wagoner*  
*ica* - But the funny thing  
is that Prof. Bailey, in his own  
hand, has marked my Her-  
mit Lake spec. *C. limosa*!  
We must try to get it again  
a little later in the season, tho'  
it is in very good shape now -  
If *limosa* it is probably a new  
*Corax* for me -

I had a fine time with you  
yesterday & shall be glad to  
play trout more & explore  
more new ponds with you -

I got my train just right &  
was home by 9.45

Monday a.m.  
yr letter just  
received. I think  
*C. limosa* it  
shall be!

Yours truly -  
R. C. Church

CONVEYANCERS TITLE INSURANCE CO.

BOSTON, Oct. 15, 1894

Dear Dr. Kennedy

My brown-handled penknife  
slipped thro' a hole in the pocket  
of the trousers which I wore  
on Saturday - I haven't the  
least idea where I lost it &  
of course do not expect to see  
it again, but if it showed turn  
up about your house or in  
either of your carriages, in  
which I rode, you will know  
whose it is -

I had a beautiful time on  
Saturday with you & the others.  
I have always had great faith  
in the Blue Hills & especially  
the W. Quincy end thereof. It  
certainly recent developments  
justify it all -  
Many thanks for your

hospitalities & kindness

yours very truly

J. R. Churchill

Dorchester; Nov. 24, 1901.

Dear Mr. Kennedy:-

What in the world are  
all these barbarous  
names which you are  
giving us for honest  
old-fashioned Vermont  
Violet; and what  
heretical and profane  
book have you been per-  
using? I know not  
V. papilionacea & V. vag-  
ula! Are these names  
& species approved by  
our Masters at the Gray

Herbarium; and have  
we old fellows got to  
begin and study our  
Botany all over again  
from the beginning?

I was very much pleased  
to hear from you, and  
all about these plants  
that we have never heard  
of, but - I hope you  
have not fallen into  
the hands of the Bronx  
Philistines!

Secretly I must confess to  
a sneaking desire to in-  
spect this new book

but I have not seen it  
yet - Perhaps I had  
better ask leave of Rand  
& "Emile" to buy a copy.

Very glad to hear from  
you nevertheless!

Yours Sincerely  
J. R. Churchill

HERBARIUM OF J. R. CHURCHILL  
NO. 32 PERCIVAL STREET, DORCHESTER, MASS.

Sept. 29 1904

My dear Dr. Kennedy

It's a good work, well  
and thoroughly done - It is  
also full of pleasant rem-  
iniscs of Willoughby, and  
of happy days spent there  
with you and other kindred  
spirits ~

Please accept many thanks  
for the pretty volume

Yours Sincerely

J. R. Churchill

Malden Mass Nov. 18. 1902

Dear Dr. Kennedy,

The plant you sent is quite interesting; it is not an alga, but I do not wonder that your friend took it for one. J. E. Agarrah, one of the best algologists that ever lived, received a specimen, and described it in a special paper as Chlorodictyon filiosum, a new genus of green algae, allied to Caulerpa. As such it has passed through various books, even Engler & Prantl reproducing the description & plate without question.

Cramer, by no means so big a man as Agarrah, found out the state of affairs, and apparently had much pleasure in writing a disagreeable note, in which he fairly "jumped on" Agarrah. It was not in very good taste in him.

The plant is a lichen, Ramalina reticulata; it grows on trees, often near the shore, & is liable to fall in the water, & be washed ashore with genuine algae.

Very truly

Frank S. Collins

THE UNIVERSITY OF CHICAGO

CHICAGO, ILL.,

Dear Sir,  
I have the honor to acknowledge the receipt of your letter of the 10th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. I am, however, unable to say whether or not they will be successful in their efforts to secure the desired result.

"Yours very truly,"

FRANK S. COLLIER

Professor of Chemistry  
Department of Chemistry  
University of Chicago  
Chicago, Ill.

Very respectfully,  
FRANK S. COLLIER

Frank S. Collier

Walden, Mass. May 2, 1904

Dear Dr. Kennedy,

Thanks for the  
Five Dollars, which has been  
placed to your credit.

I am sorry the *Lecharia contraria*  
looks loose, for I try to have the  
specimens all properly attached.  
*Lecharaceae* are among the most  
difficult things I have to deal with;  
they are so brittle; if thoroughly glued  
down, it is hard to get good pieces for  
the necessary microscopic study.

The Willoughby specimens are  
interesting: the smaller I think  
must be a form of *Lecharia fragilis*.

at home, & leave the Characeae for people who  
are interested in inland Floras. I should be very

glad of a lot of either of the forms you send, but  
it is no small matter to prepare a set of 85  
specimens of such intractable things, and make sure  
that fruit is properly represented in each one. I  
would be willing to do it myself, but could hardly  
ask anyone else to do it.

Very truly

Frank S. Collins

but I could find no fruit: I have  
a *C. fragilis*, quite like it, collected  
by the Faras, "pond near Lake  
Millaughy", which I think must  
be the same locality as yours.

The larger plant resembles the  
other, but it is considerably encrusted  
with lime, which I believe is quite  
unusual with this species. It has  
plenty of oogonia, but I could find  
no antheridia.

I wish I had the time & the  
money to go round hunting for  
Characeae, one season at least: there  
are so many forms, and I have  
had no real chance to study them;  
but I have always felt that I  
must use my vacation on the  
sea-coast, with which I am more

Astoria Feb. 18. 1910.

Dear Dr. Kennedy.

The box has arrived safely: I have not yet opened it. Having been very busy the last few days.

I very much appreciate your kindness; and apart from my being the beneficiary of it, I can appreciate your wish to have a thing that is valuable to those who understand it, but of no use to others, come into possession of the former, rather than the latter.

While I hope to do a good many years work yet, I find myself obliged to cut out some lines in which I have taken more or less interest,

and where I have had something  
that might be of use to a worker  
in that special line, I have tried  
to place it where it would be of  
such use. Of course there has been  
nothing of the same scale as this  
gift of yours.

So once more, thanks and good  
wishes, and the hope that we may  
meet at many future meetings  
of the Botanical Club.

Very truly

Frank S. Collins.

Dear Mr Collier,

yes — I think it  
a good plan for  
the Club to have  
a more active  
member than I  
in the Council. and  
to him I shall  
extend my heartiest  
cooperation for I  
practically do not  
go out evenings, tho.  
I assure you I do  
not forget the  
botanical friends  
whose company I  
have so much  
enjoyed.

Sincerely Yrs

1 Nov 1902

GGK

Malden, Mass., Oct. 31, 1911.

Dear Dr. Kennedy,

I have been appointed chairman of the nominating committee of the M.E. Botanical Club, and am expected to hand in my report next Friday evening; in going over the list of members of the Council, I see that you are among them. Now if you would like to continue I shall be glad to have you, and so I am sure will all the members; but I know you are not often able to attend evening meetings, and you may wish to be relieved of further responsibility in this matter. Please let me know how you feel about it.

If you would like to continue, of course we shall feel honored in retaining you.

Very truly,

Frank S. Collins.

Dec. 18, 1911

Dear Dr. Kennedy,

I do not know if you will be interested in the enclosed "diary", but as I have been at the Harpswell Laboratory good many summers, and know what a good chance for work there is there and how well they have utilized what means they have I think you will excuse my bringing this to your notice. The flora and fauna are quite different from those as at the other Marine stations, at Woods Hole, Cold Harbor, etc. There is a good chance for research work with prospects of good publications.

The paper on the green algae which has met with a very good reception was issued as a contribution from the Harpswell Laboratory, and the Portland Natural History Society has just published a list of the Fauna of Casco Bay based on my work there; I am sending you a copy of each. The amount they ask for is so small that there should be little doubt about their getting it, but you never can tell in such matters. Dr. Lambert, whom you have met at the club, is their active botanist; I am sure he will be glad to give you any details you may want.

Yours truly

Frank S. Collins

1911

## THE HARPSWELL LABORATORY

The Harpswell Laboratory for the study of marine biology was established in 1898 at South Harpswell, Me., on the shore of Casco Bay. In 1901 a small wooden building with nine private rooms was erected for its accommodation. In 1906 the Laboratory became solely an institution for research. In all, sixty different persons have carried on investigations there, these representing Colby, Harvard, Tufts, Institute of Technology, Wellesley, Clark, Westfield Normal, Yale, Columbia, Barnard, College of the City of New York, Cornell, Syracuse, Wells, Princeton, Lehigh, Pennsylvania, Bryn Mawr, Johns Hopkins, Virginia, Western Reserve, Cincinnati, Ohio Wesleyan, Depauw, Knox, Chicago, Northwestern, Illinois, Milwaukee-Downer, Iowa, Nebraska, Washington, American Museum of Natural History, U. S. National Museum, and the Carnegie Institution. So far, about 50 papers embodying original investigations carried on wholly or in part at Harpswell have been published, while several others are in an advanced state of preparation and will appear during the coming year. The Harpswell Laboratory has certainly demonstrated that it has a right to exist. It does not compete with, but supplements other institutions, as it offers a very rich fauna and flora, greatly different from that found at any other station, while the climate of Harpswell is a great attraction to many.

It may be said that the very moderate running expenses have been met in the past by annual subventions from Tufts and Knox Colleges, Columbia and Princeton Universities and the Wistar Institute of the University of Pennsylvania.

In the years since the foundation of the Laboratory the building has become somewhat shaky and has proved too small adequately to accommodate all who wish to work there. As it is a wooden structure it is exposed to the danger of fire and hence it is hardly advisable to attempt the collection of much apparatus or an extensive library.

In view of these facts it has seemed desirable to attempt to raise from \$2500 to \$3000 for the purpose of putting the laboratory on a permanent basis. For this sum a concrete building can be erected, sufficient to accommodate twenty workers at the same time; needed additions can be made to library and equipment, and a larger motor boat can be had, making it possible to dredge in deeper waters than is possible now.

This circular is sent to a number of persons interested in the advancement of biological science, with an earnest request for subscriptions of any amount. Those supporting the Laboratory feel that it is accomplishing proportionally as much as any other station in the world, and that it is deserving of a better building and better facilities than it now possesses. If the larger of the sums mentioned can be had it will be possible for the laboratory to enter upon the important study of the oceanography of the Gulf of Maine, one of the least known regions on the American coasts.

Any contributions and all letters relating to the Laboratory may be addressed to the directors,

PROF. J. S. KINGSLEY, Tufts College, Mass.  
or PROF. H. V. NEAL, Galesburg, Ill.

Malden Mass. Dec 16, 1911.

Dear Dr. Kennedy,

Your letter just received with the check enclosed. I wrote, with some hesitation not knowing whether the object would appeal to you and your response is liberal quite beyond my anticipation. An official receipt will be sent you in due course.

I suppose a man in your position has no end of calls for objects worthy and unworthy. I imagine at times it must be very annoying to be called on so often. This is only imagination on my part as I have never been in that position. I do not know but I would take my chances at it, annoying or not annoying. But I am hardly likely to have an opportunity.

I am sure a contribution of this amount will be very much appreciated by Drs. Kingsley and Lambert, as well as by myself.

Very truly,

Frank S. Collins.

OFFICE OF THE EDITOR,  
TUFTS COLLEGE, MASS., December 21, 1911

Dr, George G. Kennedy,

Dear Sir;

I have just received, through Mr. Collins, your most welcome gift to the Harpswell Laboratory. It will aid us very materially in providing better accommodations in the near future. It goes immediately on interest until the time for its use.

The laboratory has been a very material aid to Mr. Collins in his study of the Maine Algae. During the coming summer he expects to put in all of his available time there as we are probably to have the U.S. Fish Commission working in connexion with us in the study of the deeper waters of the region.

Thanking you most heartily for your generosity in the matter,

I am,

Yours truly,

*J. S. Kingsley*

PROVIDENCE, R. I., Jan 2 1897

Dear Dr. Kneeland:

I have been looking over my "index" for Mrs. Britton's articles and find she has published eight under the title "Studies in Mosses" as follows:

- 1.- Vol. 5 (1894) page 82. (March)
- 2.- " " " " 114. (April)
- 3.- " " " " 151. (May)
- 4.- " " " " 180. (June)
- 5.- " " " " 25. (July)
- 6.- " " " " 246. (August)
- 7.- " " " " 306. (October)
- 8.- " 6 (1895) " 17. (Feb.)

This last ("page 17") is the page number in the dept. of "Practical Microscopy" which is, in part of this vol., (unfortunately) separately numbered.

In vol. 7. (1896) she has the following.

- "The Luminous Moss" (*Schistostegia*) p. 15. (Jan)
- "The Humpbacked Elve" (*Buxbaumia*, &c.) p. 105 (Mar.)
- "The Brownies" (*Phascum* & *Pleuridium*) p. 246. (May)
- "The Water Nymphs" (*Fortuihalia* &c.) p. 442 (July)
- "The Umbrella Mosses" (*Splachnum* &c.) p. 637 (Oct.)

All these articles are 3 or 4 or more

pages long. There are also a few  
shorter articles <sup>under</sup> some numbers  
here indicated.

If, in the limited time at my  
disposal, for botanical work, and in my  
humble way, I can be of any assistance  
to you in the study of the mores  
our "hobby", please do not fail to let  
me know of it.

If I cannot give you the assistance  
or information on the particular subject  
desired (and I fear this will be the case  
only too often for I am as yet but a beginner  
myself) I can, at least, (and stand  
ready to) show it

Yours sincerely

Franklin Collins

B. DUNDAS P. O., Jan 9, 1907

Dear Dr. Kennedy.

I enclose a

specimen of *Gracilaria*, taken  
from the rocks near the

lighthouse at it, and  
I did not find more of it

in that locality either.

I have no *Gracilaria*, *maritima*  
specimens or otherwise. Do you

have any? The ones would be  
glad to see some of them.

I will you care for a list.

Enclosed is a list of some of

Co. Maine or *Gracilaria* species  
from R. I.

The latter is of course not  
rare here but I think the

former is, at East Ave, Union  
Have you any record of its  
occurrence - that date at  
hand?

Enclosed

to Union

26 East Ave.

PROVIDENCE, R. I., Jan. 17, 1897.

Dear Dr. Kennedy:

Yours of the 11th at hand  
stating I am to see the *Gerania*. It  
is entirely new to me, and am  
much pleased with it.

Enclose some *Encelium*. I only  
succeeded in obtaining *Gerania*  
as collecting *encelium* as it - as I  
would be more generous. *Gerania*  
mostly *Gerania* *castrata*

I also enclose some *Berberis* for  
locality. In my card cata-  
logue, <sup>Under *Berberis* *aphylla* L.</sup> I have a reference as  
follows: "Zorr. B., 22:50 (1893). Its abundance  
at Blue Hill, Mass."

You will probably hear from

me occasionally if any  
duplicated notes "turn up"  
that it is very interesting -

Sincerely but rather hastily  
(as usual)

J. Collins

126 East Ave

Providence, R. I.,

Jan 28, 1899.

Dear Dr. Kennedy:

I would be much obliged  
if you would get me ~~some~~ <sup>some</sup> ~~specimens~~ <sup>specimens</sup> ~~from~~ <sup>from</sup> ~~the~~ <sup>the</sup> ~~Washington~~ <sup>Washington</sup> ~~specimens~~ <sup>specimens</sup> ~~of~~ <sup>of</sup> ~~the~~ <sup>the</sup> ~~new~~ <sup>new</sup> ~~edition~~ <sup>edition</sup> ~~of~~ <sup>of</sup> ~~"Darius Key"~~ <sup>"Darius Key"</sup> and  
am much pleased with it.  
I hear that parts 1, & 170.

Brantwaite are out.

Have you many more from  
Somerset Co. Maine, or from R. I.?  
If not, am going to send you  
occasional specimens (for locality)  
as I study them out. Collected  
nearly 500 envelopes & bryophytes in the  
in 8th. But have studied but very few  
of them yet. Are you interested in  
Hepatics? Sincerely J. F. Collins

PROVIDENCE R. I., Feb. 6. 1897

Dear Dr. Kennedy:

Your letter and the drawings  
came to hand yesterday H.M. Many  
thanks for the same. I was in  
hopes to have seen you at the N.E. Bot.  
Club meeting last evening and thank you  
personally, and to be sure the more so  
when I see, so was particularly dis-  
appointed by your inability to attend.

Personally I have always <sup>considered</sup> the idea  
inapplicable when the articulations were  
no more prominent than is approximately  
represented by this  and articulate  
when more so. I find in such  
micro-monts of rosettes as I have

preserved that the articulations are no  
stronger than here represented, while in  
Bryum they are in some cases fully as  
strong as this 

It appears to be a  
question of where you draw the line between  
"appendic." and "inappendic." to a certain  
extent.

I am inclined to think that  
this is not the only point on which

the said "Learned" Doctors do not agree

Will bear you in mind when  
I get to work on the R.I. and Me. mosses,  
which, however, may not be for some little  
time yet.

Sincerely,

J. G. Collins

126 East Ave.

Providence, R.I., Feb. 23/77

Dear Dr. Kennedy:

Pours of the 22d at sand.

In my copy of Index Synonym. - find on  
p. 124 the following:

"Coolyganus Sperry -- H. trichocarpus"  
and on page 645 insert H. trichocarpus  
as a synonym, the following:-  
"H. Coolyganus Sperry, 1833. (fig. incl.)"

On page 622 there are <sup>intentional</sup> 3 typ. errors which I detected in looking up this matter. On line 7 "codonofugis" should be "codonofugis", and on line 8 the first and last words should be "coelofugis" instead of "calofugis".

I am very glad you mentioned the subject  
as I think a great deal is learned in an  
interchange of ideas. I do not think  
that the mosses have yet been etc. etc.  
or collected sufficiently for us to know  
all the localities by any means, even as  
late as 1877 to say nothing of 1884 (L. & J. Thum)  
Anacamptodon occurs on Phytolacca and Samolus  
in Va. (see Mem. Torr. Club, 4:186)

Cordially J. Franklin Collins, 126 East 12th

PROVIDENCE, June 8 1907

Dear Dr. Kennedy:

Some time ago Mr. Stand wrote to me about the N.E. Club proposed check-list of N.E. plants and asked if I would take the mosses (exclusive of Sphagnum) with you.

I replied that I was willing to do the best that my limited time and ability would permit.

But I fear that will not be much for my time is indeed very limited and consequently, if for no other reason, my ability also.

I have delayed writing you until now in hopes that I could have attended the last N.E. Club meeting and have an opportunity to talk the matter over with you.

Unfortunately I was unable to get away from the city last Friday eve.

What do you think of dividing up the territory on the subject? Do you prefer to work independently, at least for a time?

I have already committed myself to the Josselyn Soc. of Me. to work up, as far as time and ability will permit, the Bryophytes of that state; or at least to help work ~~it~~ up that group.

I have also studied some (and collected more of in connection with R.I. Bryophytes (mosses principally).

Furthermore I know that you have collected  
more or less in Mass., N.H., & Vt.

Admirably, I think the best results are obtained  
by a division of the subject, but under the  
circumstances, it seems as if a division of the  
territory would be just as well in this case  
and I might add, a little broader as far  
as I am concerned at present. What do  
you say to your looking after Mass., N.H., & Vt.  
and I R.I. & Conn. I would like to know  
in what field in relation of us (or some one else)  
i.e. any information or specimens either if we  
obtain from Ct. we are to hold until some  
other arrangement is made — unless, of  
course, you would like to look after that state  
in which case I would be very pleased.

Please regard the above only as suggestions  
towards some mutual understanding on the  
subject. Perhaps you have some-  
thing better to propose. If so I would  
be glad to hear of it.

Do you know who is to look after the  
Sphagnum and Hepaticae?

Sincerely

J. F. Collins.

PAULDEN, June 13 '97

Dear Dr. Greene,

Yours of the 13th at  
Paulden. Am glad to see your  
for revision of botanical notes, your  
approval. If you get a chance  
to visit me, two states do not hesitate  
to do so. The more visits the better.  
Would be glad to know the results of  
any such visits however. as it is  
my intention to inform you of  
results of my invasion of your  
domains with such your specimens  
too when duplicated and returned.

By the way I have in my herbarium  
some 60 (?) species of mosses & hepatics  
collected by the late Frederick Steud. I have  
mostly from California Co. & some from  
Europe & Wisconsin. and a few seeds & spores  
from Mass. & N.H. a list of which  
I will be glad to supply when you get  
ready to use them.

With best wishes for a pleasant  
and profitable Willoughby trip I am  
Cordially

EVIDENCE, I. I., June 22 1907

Dear Dr. Kennedy:

Yours of 20th from  
Wilmington at hand. am glad  
to hear you had such a fine time  
in spite of the weather.

Have you ever found *Schistocarya*?  
I see it is reported from "near Profile  
House" and "Divide Notch" N. H.;

I expect to attend the Maine Bot.  
Society meeting at Dover July 6-9.  
Have been making out my report  
and find I have to report - 34  
bryophytes previously unrecorded  
for the state, i.e. to the best of my knowledge)

Am in hopes to visit Maine again  
in Aug. for 2 weeks. These are  
the only outings I anticipate

for the summer.

I enclose the list of Blanchard's  
mosses.

Also 2 from N.H.  
which happen to be numbered along  
with the Blanchards.

Rather bushy but interesting;

J. Collins

126 East Ave.

Instructor

PROVIDENCE, R. I., June 25 1897

Dear Dr. Kennedy:

Yours of the 2nd at Camb.

I have Schizotegus from N. Y. (100 Britton)  
so please do not divide the Canadian  
specimens in my account. I thank  
you however for your kind offer.

I shall be pleased to have you spend  
an afternoon with me, whenever we can  
arrange it.

One of the best times for  
me would perhaps be this coming week,  
(June 27 - July 3)

I am employed  
daytime at the Graham Mfg. Co and my  
c- tomorrow night for a two weeks  
vacation. Next week I expect to be about  
the city.

I leave on the Sunday night Boat  
for Boston (7 P.M. - July 4th) for the N. Bot. Club meeting  
for a week. I expect to be away on  
another Maine trip from Aug. 5. to Aug. 20.

During July and Aug. I have Saturday  
afternoons to myself. But the rest of the  
year only evenings and Sundays, except  
when special arrangement is made.

Fernald usually drops in on me Sundays.  
I merely mention this so that you may  
know that I am ~~not~~ "not at home" to  
Sunday callers - particularly botanical ones

If there is a possibility of your coming  
down this next week, please let me know  
as soon as you can conveniently for my  
visit, so that I can know what time  
the coming week he wants me to operate  
on in a couple of hours or so.

If this appointment and your intention  
visit should happen to take place some  
time soon I would much prefer to  
perform the operation than to have you  
perform the visit. This I can easily do  
without any inconvenience whatever to  
me or my work if I have a week or  
so of time.

If you come down here I give you  
fair warning you must expect to see  
the worst looking Botanical "den" you  
ever were unfortunate enough to get  
into. So be prepared!

I shall try in my humble way  
however to make your visit pleasant,

Sincerely,

J. Franklin Collins

126 East Ave.

P.S. Let me know what train you will come  
on and I will meet you at the station  
if such a thing is desirable.

P.S. #2. By the way, it occurs to me that you said in your  
last letter that you started for Mansfield July 1st. so  
perhaps you ~~will~~ cannot find time to come down this next  
week. Well, if not, come when you can find time? J. F. C.

PROVIDENCE, R. I., June 29 1897

Dear Dr. Kennedy:

Your speaking of collecting  
Trematodon ambiguum at Willoughby  
reminds me to make a correction in regard  
to the no. of sp. I intend to receive the  
Fossiliferous L. It has happened (the need of  
correction) I have since I wrote your last.

Sunday last while walking along a road  
in the city I found T. ambiguum  
by the roadside. I had previously been  
acquainted with Trematodon but in looking  
up this plant found it was not recorded  
for R.I. but was for Maine.

In 1891 Hemmell collected a Trematodon  
at W. Barns, Me and it was determined by  
Dr. Barnes as T. longicollis. This I  
had intended to report at the foreign meeting  
on Dr. B's authority. In comparing the  
R.I. specimens I find they appear to be identical  
with the Me. and also with Alaska specimens  
distributed by Howell and European specimens  
distributed by Cardot. I enclose a little  
"scrap" of Hemmell's specimen of which you  
may keep (also the R.I.). Please compare it with yours  
and let me know your opinion. I have not yet  
made a critical micro. analysis of the

Maine specimens and hardly think it  
necessary in this case; do you?

The persistence of Poth <sup>enclaved</sup> have the teeth divided to base.

Sincerely,

J. Collins

126 East Street

126 East Ave. Providence. Mar. 1, 1898. Dear Dr. Kennedy:

The truth of the old proverb about the "ill wind," &c is again illustrated. Yesterday P.M. & today I have been having a slight cold and headache - just enough to keep me out of the shop but not enough to prevent my doing a little manual work - to keep myself out of mischief.

Yesterday P.M. I concluded I would rather build one of these slide-heaters <sup>myself</sup> than to sit about and do nothing so I got a few pieces of metal and wood and went to work.

It is all finished now (unless you decide you want the wood stained or painted - I like it better, without either) It works finely have been using it this P.M. to transfer some of my own dissect-  
ins. It is just as fine looking as a professional mechanic would have made it - but it does the work. It is a little different from mine so would like to explain personally about it if possible, but if you get a lot of mounts ready for the jelly before we can see each other again, let me know and I will express it to you. Sincerely J. H. C.

Mar. 28, 1898

Dear Dr. Kennedy:

Have you a good,  
authentic, topographical map of the  
White Mt. region? If not, please  
let me know before Friday for I  
have an extra one that I will be  
glad to donate to some needy or worthy  
White Mt. botanist. Hastily J. F. C.

POSTAL CARD - ONE CENT.

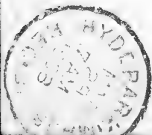

PROVIDENCE

United States of America

THIS SIDE IS FOR THE ADDRESS ONLY.

Geo. G. Kennedy, M.D.,

HAVEN METCALF, A. B.  
Instructor

PROVIDENCE, R. I., .. May 23. 1898

Dear Dr. Kennedy:

I have no card catalogue references of Plagiobryum Tieeri.

Last evening I looked over the Bryum, on which we worked in your den, a little more carefully.

The result - I am a little more puzzled. I cannot make it fit the descriptions & illustrations of Bryum bimum and feel quite sure it is not that - at least not typical.

But what is it ??

Am going to give it more of an over hauling when I find a little more time,

By the way, I asked my mother last evening why she did not allow the Italian "greens diggers" on the lawn.

Her reply was suggestive and conveyed a different impression from

the one I gave you yesterday so I  
hasten to correct it, although you  
may not have taken my lightly  
made suggestion seriously.

Her reply was:- "Because they cut out  
a piece of turf with the dandelion and  
then drop the pieces of turf back on the  
lawn again."

Your son's remark about the remedy  
being perhaps worse than the disease was  
doubtless nearer right than I thought  
at the time.

Hastily but cordially  
J. F. Collins.

BROWN UNIVERSITY

J. FRANKLIN COLLINS, B. P.,  
Curator of the Herbarium

HAVEN METCALF, A. B.,  
Instructor.

PROVIDENCE, R. I., June 21, 1888

Dear Dr. Kennedy:

Yours of the 19th at hand,  
containing the first intelligence, to  
me of Mr. Faxon's death.

It must have been a great shock  
to the Willoughby Party.

Although I was not personally acquaint-  
ed with him I shall mourn his  
loss in common with many other  
botanists.

Although not personally acquainted  
with him I have had the pleasure of  
a 5 minutes conversation with him  
on July 12, 1889. I was on the way  
from the Crawford House Station to the  
Blue Cascade in the Notch and just  
at the <sup>Gate of the</sup> Notch met an ~~and~~ elderly gentleman  
who in the course of a brief talk said  
he had been collecting *Sphagnum* to  
send to Dr. Warming. It was nearly  
a year later before I knew who

He was, and I then learned by  
reading Dr. W.'s article on Iphragma  
in Botanical Gazette.

I have always remembered him  
with pleasure from that brief meeting,  
for, even to the stranger that I  
was to him, he exhibited signs of  
that kindly nature which must have  
been highly cherished by all his  
intimate friends.

Kindly remembers me to Mr.  
William and Mr. Greenman

I hope and trust you will all  
have a pleasant and profitable trip

My only regret is that I am not  
one of the party. If such a thing  
was possible I fear I should be ~~strongly~~  
~~tempted to be~~ found guilty of  
a breach of etiquette (or whatever you  
choose to call it) by inviting myself  
up to Mt. Washington this week.

Sincerely,

J. F. Collins,

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY.

*Curator of the Herbarium*

HAVEN METCALF, A. M.,  
*Instructor.*

PROVIDENCE, R. I., Feb. 6 1899

Dear Dr. Kennedy:-

Your letter at hand.  
I have the B.W. Pottia's and my  
own all packed ready to send  
by express as soon as I can get  
down to the office - tomorrow I  
hope. I have not studied the  
B.W. specimens any, so if you  
see any changes don't hesitate to  
write on the paper or envelopes. -  
shall be glad to have you do so,  
on either B.W.'s or mine.

I was very much grieved to hear  
of your affliction - as were the  
rest of my folks, - and we  
wish to express our earnest  
sympathy. We heard of it  
first from Mr. Fernald who  
spent Sat. & Sund. (Jan. 28 & 29) with  
me. Am glad to hear  
that you and your son are

convalescing, and hope your  
kindness in regard to my coming  
will not be relaxed.

So far, we have all escaped  
the grip, though nearly all of us  
have had more or less severe colds.

Perhaps you may be surprised  
to learn that I have not worked  
(in the shop) but 9<sup>(?)</sup> days since I  
visited you in August. The  
cough, with which I was afflicted at  
that time, improved so that I returned  
to work again a few days later, but  
I did not fully recover and about  
the middle of Sept. had to give up  
again. Kept getting worse till  
early in Nov. and since then have  
apparently been steadily improving,  
though very slowly. Cause,  
bronchitis and kindred complications.

The most obstinate trouble was  
caused by two patches of false  
(catarrhal) tissue in the throat  
which required a month or more  
of constant treatment to reduce.

HAVEN METCALF, A. B.,  
Instructor.

P. WIDENGE, R. ...

1891

I am not a well man by any means yet but am out most every pleasant day and have gained 9 lbs since Thanksgiving. As you may suspect I, too, have done no botanical work to speak of for 5 months, though at times, when I have felt the best, I have done a little light work and also a little writing. I am in hopes to feel well enough to do some in earnest soon.

I shall send the package by express, addressed the same as this letter.

I do not know that I am in any special hurry about the return of the Potters - whenever you get through studying them.

With kind regards to you and yours.

J. F. Collins

HAVEN METCALF, A. M.,

Instructor.

PROVIDENCE, R. I., Feb. 10 1899

Dear Dr. Kennedy,

Perhaps it will be as well  
for you not to return those Pottier  
(even if you should finally study them before -)  
for a week or so, at least as  
me a "up in heaps", as to speak,  
at the herbarium at present.

Last evening about 6:45 (temperature  
below 0) a fire started in one of the  
dormitory rooms ~~down~~ in Maxey Hall  
directly over the herbarium. An  
alarm was quickly sounded followed  
almost immediately by a second.

The firemen worked about 4 hours  
to subdue it. The 3 upper stories (36  
rooms) pretty well gutted. All the walls,  
most of the floors, and a portion of roof  
still remain. Loss about \$15,000. The  
fire did not work down, but the  
water did. Fortunately the herb. doors  
were kept closed most of the time and  
only a very small portion of the water

worked in. Probably at no time was there ~~more~~ more than 2 inches of water on the floor, though the water in the corridor outside the door was measured by feet. Quantities of water also came through the fire-tile ceiling (and has not yet stoped coming) and nearly all the cases were drenched, but they stood their test admirably as the only damage to the specimens that I have been able to find so far is confined to those in the uppermost (and occasional occasionally the lowest) pigeon-hole of a few cases. In these the edges of the mounting paper is wet for  $\frac{1}{2}$  inch or less (nothing more) or three dozen books were badly wet, a few literally soaked, but nearly all of them are modern books easily replaced.

The Botanical Laboratory escaped with still less damage. - a few wet books & microscopes. A few boxes of economic specimens stored under the roof went up in smoke. We dare not yet open the herb. door in account of 6 inches of water yet in corridor. We enter by the window today. J. F. Collins

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY,  
PROVIDENCE, R. I.

Feb. 16. 1879.

Dear Dr. Kennedy:-

Yours of the 12<sup>th</sup> received a day or two ago. I am very glad to get the Pleurid. subulatum. as I have none in my herbarium. Many thanks for it! I am going to admit that the Pleuridium subulatum business is something of a puzzle to me; i.e. I have a suspicion that some of the plants reported as subulatum ~~might~~ may be alternifolium. However, here are my references.

In the Proceed. of Prov. Franklin Society for April. 1847. page 36. is this, by Stephen Y. Ulmer.

"Musci. - I am indebted to Wm. S. Sellwaint, Esq. of Columbus, Ohio, for notes on my doubtful species, kindly communicated to him. A copy of the beautiful Musci Alleghaniensis, obligingly lent me by Prof. Gray, has been an invaluable aid in the determination of the names of plants in this order." — then, immediately following.

"1121. Phascum subulatum Linn. Bush & Schum. Brys. Eur. fasc I. p. 15. t. 9. Sandy banks, North Providence."

In regard to Musc. localities Thos. P. James says in Trans. Amer. Phil. Soc. (1865) p. 107. "P. <sup>(Phascum)</sup> subulatum, Schreb. Hab. Uncultivated fields in Pennsylvania, New Jersey and Massachusetts. Tuckerm. & Frost in <sup>their</sup> Cat. Amherst & vicinity (1875) <sup>p. 46.</sup> record both Phascum alternifolium Brid. and subulatum Schreb. so, also, ~~the~~ in Hervey's Cat. New Bedford and Shore of Buzzards Bay both Phascum alternifolium Brid.; and subulatum Schreb. are recorded

In N. A. Collis' list of plants growing within 30 miles of  
Amherst <sup>(1887)</sup>, both Pleuridium subulatum B.S. and P. alternifolium  
Brit. are recorded.

You will notice that Phaeum subulatum Schreb.  
is given as a synonym of Pleuridium ~~of~~ subulatum B.S.,  
in L. & J. Mem. page 43. while in Grath. vol. I. p. 95 it is  
given as a synonym of Pleuridium alternifolium (Kaulf) Rabenh.

Now, this mixture of synonyms prompts the two  
questions (1) Would it not be reasonable to suppose that  
D. P. James held the same opinion in regard to synonyms  
in both his Phil. Soc. article and in his Manual?; and  
(2) Is it not <sup>more</sup> likely that Phaeum subulatum Schreb. in  
Duck. & Frost's and in Hervey's Catalogues should be continued  
as Pleuridium subulatum rather than as P. alternifolium,  
particularly as the latter is recorded separately?

Of course, I have seen no specimens of any of the above.  
as yet; there may, however, be some of the "North Providence", R.I.,  
specimens in the B.W. Herbarium. Shall look next time  
I go (now, if I can remember). The Herbarium is now  
pretty dry again as the steam has been turned on "full  
blast" for 6 days, and the temperature has been from  
78° to 85° or 86° most of the time. I have not been there  
but twice this week, so far, and then only for stops  
a few minutes each time. I think by next week there  
cannot possibly be any danger from the source you  
so kindly pointed out. Aside from books and furniture  
the estimated damage to Lib. (as given to insurance commission)  
was ten dollars. With kind regards to you and yours

Cordially. J. F. Collins.

Our electric is once more in running order again after the blockade.

126 East Ave.

Providence R.I.

Feb. 21, 1879

Dear Dr. Kennedy: -

It seems to me that the best method of separating Pleuridium subulatum and alternifolium is, as you say, by the position of the st. fls. I have, as yet, scarcely studied the genus ~~yet~~ so I cannot say, from experience, how the method works out, but should judge it might be excellent, and am glad to have your opinion. Lately I have come

to use the term "gonioautoicous" for the form of autoicous inflorescence found in Pleurid. alternifolium. I find it very convenient and precise.

For the 3 forms of autoicous inflorescences see Braith. Br. Moss-Flo. Vol. I p. VII (glossary)

I do not have access to Simprich

so have never noticed about his separation of *Polytrichum* & *Pogonatum*

According to my investigations *P. alpinum* is reported only from Me., N.H., & Vt., in N. E.

N. A. Cobb's catalogue was printed at Northampton in 1887; its full title is "A List of Plants Found Growing Wild within 30 Miles of Amherst"

I have no copy of the catalogue only a m.s. list of the mosses & hepatics which I made from the copy at the Gray Herb. some months ago.

The B.W. Herbarium is all right again and ready for business..

As the room has become thoroughly dry again we find considerable warped woodwork, and all varnish or shellac, particularly the former, is peeling off in flakes.

Sincerely  
J. F. Collins

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY.

W. WHITMAN BAILEY, A. M.,  
Professor.  
J. FRANKLIN COLLINS, PH. D.,  
Lecturer and Instructor.

PROVIDENCE, R. I., Dec. 23, 1899

Dear Dr. Kennedy:-

Yours of the 21st received today. Have examined the ms. and returned it to Dr. Robinson.

Mr. Merrill is aware that I am at work on the *Flora* (that is, when I get a chance) and some time ago cordially invited me to allow him to use (for publication) such notes, etc. as I had accumulated, in other words, to allow him to publish them as a Contribution from Univ. of Me. Nat. Hist. Dept., or something of that calibre, as near as I can remember.

Of course, as I understood it, he was to publish some notes of his own and perhaps add mine as a supplement, or appendix, or postscript perhaps!

Well, I still have my notes and am inclined ~~to~~ to hold on to them a

few days(?) longer in hopes that I  
may, in the more or less distant future,  
get them in shape for publication,  
myself.

Am sorry you are not in prime  
condition but hope this fine weather  
may help matters with you

I was out collecting no day in Nov.  
and <sup>caught</sup> a cold which kept with me  
for about 10 days. As luck would  
have it the very day my throat was the  
worst I had to give a 2 hours lecture  
For the first hour I was troubled considerably.  
then it began to get better and continued  
to do so. Note - a new cure for sore-throat.

I have been unusually busy all  
the fall. Just at present we are having  
a vacation till Jan. 3. Have not done  
much of anything with mooses since Aug.  
but hope to before long. Shall have to  
in the spring as I have a class then in  
Bryophyta and Pteridophyta

Allow me to reciprocate most cordially  
the Christmas greetings to you and yours.

Sincerely, J. F. Collins.  
126 East Ave.

W. WHITMAN BAILEY, A. M.,  
Professor.  
J. FRANKLIN COLLINS, PH. D.,  
Curator and Instructor.

PROVIDENCE, R. I., Dec. 4, 1900

Dear Dr. Kennedy:

The photos. arrived today  
and I am delighted with them.

Many, many thanks for the same.

I have had to look them over everytime  
I have been in the house since (4 times)

Judge Churchill "on the stump" will certainly  
take first prize, and either your or me  
in front of the "cape" will perhaps take  
second. I did not think you would  
treat poor Emerson in that way.

Those groups on the summit are jolly!

So, also, are many others. I think it  
is fortunate that I sent mine out first  
for yours are so much finer than my,  
views as well being larger, yet covering  
a smaller area. I shall value the  
set greatly

I hope to see you Friday. I have not  
yet looked up the matter of trains but will  
try and think of it tomorrow and let you

know . Dr Bailey has not been over to  
the college today . He may be ill for he  
was not well yesterday . He is ~~in~~ hoping  
(and so was I) to dine with you Friday .

Cordially.

J. Franklin Collins

468 Hope St.

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY.

W. WHITMAN BAILEY, A. M.,  
Professor.  
J. FRANKLIN COLLINS, Ph. D.,  
Curator and Instructor.

PROVIDENCE, R. I., Dec. 9, 1900.

Dear Dr. Kennedy:

I reached home about 1 A.M.  
this morning, after an enjoyable evening  
at Dr. Drue's.

I do not know as I thanked you and  
your family for the good time spent at  
your house. A neglect of that nature  
is a frequent oversight of mine at the  
time. However, I trust it is not always  
necessary to say "thank you", or something  
similar, in order for you to know that  
I had a good time and appreciated it.

To day I have been looking over  
my Katahdin moss labeled "Dicranum  
elongatum" (7 packets) with the result  
that I still think it is D. elongatum or  
very near that. I cannot see how  
the specimens I have examined today  
can possibly be a Melichhoferia or  
anything of a bryoid nature. I find  
the leaves with <sup>small</sup> quadrate or isodiametric

cells above, larger near middle of leaf  
and larger and still larger at base with  
large quadrate alar ones which are ~~red~~  
reddish or yellowish. The walls of basal  
cells (or near base) exhibit a strong tendency  
to be pitted, though not abundantly so.

The leaves do not appear to correspond exactly  
to the figures in Bry. Eur. (pl. 76.) in that  
they are not quite as attenuate as there  
figured, yet much nearer those than  
to the figures of any *Hedichlophora* which  
I have seen.

I find many of the  
leaves on my plants more or less broken  
suggesting fragilliplum in as far as that  
character is concerned.

The specimens collected near the summit  
differ slightly from those collected on the  
tableland in having slightly shorter and  
smaller leaves, yet even these are not  
willing, apparently, to run anywhere except  
to elongatum.

Should be extremely interested to know  
what you and Dr. J. M. decide about  
the specimens.

Cordially

J. M. Collins  
468 Hope St.

468 Hope St.

Providence. Dec. 10, 1900

Dear Dr. Kennedy.

Saturday I noticed a label in the James Collection as follows "Bryum alpinum Mt. Washington, Aug. 1862"

I did not look for any other specimens of B. alpinum so do not know if that is the only one.

Would you like a bit of Splachnum Wormskjoldii from Labrador?

I have just found a fair sized packet of it among Delawarean mosses.

Cordially,

J. F. C.

*Geo. J. Kennedy, N. D.*

*Reedville*

*Nova*

463 Hope St.

Providence, Dec 13/1940

Dear Dr. Kennedy:-

When I wrote to you  
a few days ago about the  
Dicranum elongatum I had  
not <sup>recently</sup> seen a certain packet  
which I had labeled. "New  
specimen, S.G.K.". This is doubtless  
the packet of which you spoke  
while, <sup>I was</sup> at your house, for it  
looks in a general way like  
the D. elong. but ~~is~~ <sup>is</sup> ~~very~~ <sup>very</sup> ~~different~~  
(or at least apparently from a  
superficial examination) more  
like a Webera than Dicranum  
When I can get a little time  
I am going to examine it  
myself. Mr. Chamberlain is doing  
so now.

Cordially,

J. F. C.

PROVIDENCE, R. I., Dec. 18, 1900

Dear Dr. Kennedy: -

Am sorry to hear that you have the distemper, if it can be called such, which seems to be going the rounds, and hope you will get rid of it very quickly.

I have had more than a week of it myself since I saw you last, but seem to be all right again now, or very nearly so.

I suspect your specimen from the deep pool under the rock is, as you surmised, a Medusobolus or something very near that. Since writing you about Desmoussaea elongatum (of which I have several packets) I have found one package of the moss under discussion collected <sup>by</sup> you. I have not yet overhauled it however.

I enclose the Splachnum.

Cordially. J. Franklin Collins  
468 Hope St.

BROWN UNIVERSITY

W. WHITMAN BAILEY, A. M.,  
Professor.  
J. FRANKLIN COLLINS, PH. B.,  
Curator and Instructor.

PROVIDENCE, R. I., Dec. 23, 1900

Dear Dr. Kennedy: -

Please don't ask me anything about *Licranum*. Dr. Greene is the man you are looking for.

I have tried to determine a couple of *Licrana* within two days and as a result have decided that I do not know much about the genus and probably never have. If you had asked me a week ago I probably would have suggested *scoparium* or *maifera* but today I feel more like saying any *Licranum* from *fulvellum* to *elongatum* might be the one you are looking for.

Have been up to Harvard 5 days the past week and expect to be there nearly every day (except Christmas) the coming week. Have completed the rehandling of *Bryum* and find only a single small envelope of *B. alpinum*, that is

the one of which I wrote you

Cordially.

J. F. C.

468 Hope St.

I wish you all a merry Christmas

Apr 17, 1901

Dear Dr. Kennedy:-

I suppose it is about time for us to get our Kataldini moss-list into shape is it not? Have you increased your list any since I was at your house? I hope your eyes have not kept you away from the work altogether.

I have been working with the idea of giving the names in a list with the ~~last~~ statement that they were collected by Kennedy & Collins and determined by Kennedy, Collins, Chamberlain, or me and then giving a separate article (brief) in regard to any interesting finds. Now I suppose it would be best to make one list of all, would it not? If so shall I send you my list and let you consolidate it with yours or ~~do~~ your eyes forbid? If the latter please send me the list of any additions you may have made since I saw you at your house. You will remember that I there made a note of such specimens as I had not yet seen. I still have that list, so it need not

be duplicated. I have found that I have  
duplicates of some of them. but the following ones  
I have not yet found:—

<i>Leskea polycarpa</i>	<i>Dielisiana pallens</i>
<i>Hyp. eugyrium</i>	<i>Hyp. palustre</i>
<i>Dicranum falcatum</i> *	<i>Polytrichum commune</i>
<i>Atrichum angustatum</i>	<i>Mnium cuspidatum</i>
" <i>leiophyllum</i> *	<i>Bryum pullescens</i> *
<i>Weberia elongata macrocarpa</i> *	<i>Ulotia Lindb.ii</i>
<i>Weberia pennata</i>	" <i>crispa</i>
<i>Lecanodermis scirroides</i>	" <i>crispula</i>

Those marked \* seem to be new to Maine & the  
Weberia new to N.A. according to my records of  
printed matter.

In case you decide to send me your list  
please indicate how many of the above specimens  
you would be willing should appear on the  
list on your authority.

I cannot think your *Strichum* "*leiophyllum*"  
is <sup>just</sup> the same as Macoun's. I inclose drawings  
of both for you to examine.

Can you send me a bit of your *Dicranum*  
*falcatum*? I want to compare it with *D. fuscescens*  
var. *Eatonii*.

Please let me know if I shall send you my list.

It comprises about 70 species (perhaps 12 new to Maine)

Very truly, J. T. C. 468 Hope St.

I inclose 7 drawings

Apr. 19, 1901.

Dear Dr. Kennedy:

Your two letters at hand. Will try and find time to examine the specimens tomorrow. Fernald told me at last Club meeting that if ms. was in hand by May 1 it was time enough, so I think if you write to him <sup>(or Dr. R.)</sup> and explain reasons etc. he will say it will be all right if we hand it to him at the next meeting (May 3).

I would be glad to know what he says as soon as you hear from him and we can then arrange for a final seance, for I agree with you that we ought to have one.

I inclose list as it now stands. (I suppose alphabetical arrangement is satisfactory is it not?) This ~~list~~ includes the list which you gave me of your additions, and the specimens marked "G.S.K" in pencil are those which rest entirely in your names (i.e. I have found no such specimens among my specimens). The "?" indicate specimens

which for some reason I want to examine a little more carefully.

The *Tayloria* is the plant which you collected in the carbon bones; a portion of which you handed to me.

Would it not be better to call the list a preliminary list or something of that sort? Make any annotations you see fit on the list for, of course, it will be copied before sending in.

No special hurry about returning it. Keep it a day or two if you wish.

I still have a good many fragmentary sterile undetermined specimens which if carefully worked out might add a few species, but it will be impossible to attend to them before May 1. They are in all cases fragments which have been separated from other more abundant specimens.

Very truly,

J. D. Crampton Collins.

468 Hope St

P.S. It is my intention to send in another article, besides this list, in regard to some of the more interesting species which have turned up in my own set. Are you thinking of doing the same in regard to any of yours.?

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY,  
PROVIDENCE, R. I.

Apr. 23, 1901

Dear Dr. Kennedy:

Have you thought of the possibility of your Umin being U. rustratum? Is there enough to determine whether it is gracilis or discolor? U. rustratum usually has larger cells than cuspidatum though smaller than affine. (See D. & J. Handbook)

I have examined <sup>the</sup> ~~your~~ mosses which you sent me recently. Your "Difalcatum" seems to correspond very closely to my D. fuscescens Eatonii R. & C. (det. by true) yet there seems to be a slight difference especially in cross section near apex of leaf. I inclose drawings of <sup>both</sup> yours (#2148) and mine (#2280). I also send you a specimen of the latter for your h. b.

I have made careful drawings of your supposed Hyp. palustre which I inclose as #2149<sup>a</sup>. I suspect it will have to be placed in Hyp. imbricatum (see note on back of drawing)

I also inclose drawings made from

the Hyp. montanum which you handed  
me when I was at your house  
last. I have since found the same  
moss in my own collection and have  
added an outline pencil sketch of the  
leaf of mine to the same sheet as the  
drawings made from yours which are in  
ink.

It seems to be ~~to~~ be correctly  
named and from my records is a good  
find. The only records I have of its  
occurrence in N. Amer. are those given  
in Macoun's Cat. and in L. & J. Man. (viz:-  
N.Y., Ont., & N.H.) Would it not be a good  
plan for you to prepare a separate note  
in regard to this species (I mean separate  
from the list) and send it to Rhodora?

Cordially

J. F. C.

468 Hope St.

No hurry about returning the drawings. Perhaps  
you may as well keep them until I see  
you unless you take exception to  
some of my conclusions in regard to  
them.

Apr. 26, 1901

Dear Dr. Kennedy:

You are a good one for propounding puzzles. I am referring to your Minium now. I have found none of the few leaves examined to have cells any smaller than those figured in inclosed drawings which range from  $40-70\mu$  long  $\times$   $30-50\mu$  wide (measure the drawings). The drawings marked "(a)" were all made from leaves taken from the same branch and all the drawings marked "(b)" were made from the same leaf which was taken from a different branch <sup>or perhaps plant</sup> than those marked "(a)". I suspect "a" is some form of affine and perhaps "b" also, yet the shape of the latter is quite markedly different. Perhaps you have two forms - perhaps two (Kindsberg) species.

I think your suggestion in regard to Chamberlain is a good one for several of the specimens on my list will have to rest entirely on his determination for I shall not have time to

verify many of them. I think we  
can arrange to reach Bendville  
at either 11:19, <sup>1:19</sup> or 3:19 as you think  
best. (or even at 9:19 if you think <sup>that a</sup> better time)

Many thanks for the maps. I have already  
written to Capt. Rogers thanking him.

I don't know just what you mean by  
Austin's *Mellichhoferia*. I have seen  
no record (in print) of any Mt. Washington  
specimen, nor any specimen either.

Will look at our set of Mus. App. tomorrow  
if possible.

My Dir. for Eaton's  
is that fruit

I have three or four packets which  
contain a little *Fossidens* but I have  
not yet worked out any of it.

I hope to get a cruise before next Friday.

I am extremely puzzled to know what  
to do with your *stirium* "*Leiophyllum*"  
and also with my *Philomotis* "*fontana*"

It looks as if we might have quite  
a little studying and comparing to  
do when we get to your house next  
Friday so perhaps your suggestion of a

"considerable portion of the day" might be  
such arrangement is

^ when if not inconvenient to you

Yrs. &c J. F. C.

I shall plan to take up drawings and make specimens as  
many need discussing and checking with the same

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY,  
PROVIDENCE, R. I.

Apr. 30, 1901

Dear Dr. Kennedy:

I received your coin letter this morning, and was very sorry to learn of your illness. I hope you have seen the worst of it and that you will rapidly recover. Of course I understand it is out of the question to expect you to use your eyes any for the present.

Mr. Chamberlain and I have decided to hold a special council-of-war over the list on Friday afternoon and make any revision necessary, and then take the list up to the Club meeting at the regular time.

We intend to cut out all specimens collected only below the 3000 ft. level, as you suggested.

I have a few questions to ask however, and will make them as few and as simple as possible.

Do you think it would be better to mention your Strichium as (doubtfully)

It is raining here this afternoon for a change. Cordially J. H. C. 468 Hype St.

Leisophyllum

and mention how it appears to differ from description of that sp. or had we better omit it altogether for the present?

I would ask the same question in regard to your Murium cuspidatum, affine, or rostratum (whichever it may be)

Since you made a note after Hyp. eugyrium that you "don't know yet, shall look at it again".

I suspect you have not had a chance to examine it again so if I do not hear from you to the contrary I shall omit it from this list.

Do you have any positive recollection of any Melichhoferia having been reported from the White Mts.?

Have you any suggestion<sup>in</sup> addition to what you have said in regard to Weberia elongata macrocarpa which was "apparently"?

If you think I had better mention the Strichium and Murium will you please return the drawings as I may need them in preparing my notes.

If I have asked too many questions tell me to do as I like or something similar or worse. If I do not hear from you by Friday morning I shall have to "do as I please" anyway

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY,  
PROVIDENCE, R. I.

I am up to your tuiles  
Here are the drawings which  
ought to have gone with the  
letter which I have already posted,

J. J. E.

PROVIDENCE, R. I., U. S. A., 15 Apr 1904

Dear Dr. Kennedy:-

The pamphlet came  
safely to hand.

I shall be happy to accept  
your kind invitation in connection  
with the Waltham trip. So far as  
I know now I can go up early Saturday  
morning (i.e. in a.m.) as I have  
no classes now on either Saturdays  
or Mondays. I do not know  
what time the train goes from here to  
Readville but will find out and  
let you know when to expect me later.

I have been working for 7 hours  
steadily, <sup>since 9 a.m.</sup> on Phanerogams - mounting up  
everything that I have collected for the  
past 3 years that I wanted in my herb.  
This is the 5th or 6th session I have  
had of this sort within a month.

I have the job practically completed  
now and in a few days hope to have  
all of them in my herb, out of

the way and off my mind.

I hope you did not seriously mean what you said in your letter about my going along (on Weltham trip) to name mosses. I believe you did not really say that but I got that idea from what you did say.

I do not think you can be any more rusty than I am. All winter I have had Prof. Bailey's work to do and not a moment (except at rare and widely separated intervals) for mosses.

This term I have a little more time (or rather very much more) and the first thing I have undertaken is to get my bundles of flowering plants taken care of for good. I am now or I am going to devote the time to collecting planewegans unless I know a thing is rare or very interesting and there is no one with me to "gunk" it.

I trust hope to have more time for moss work.

Cordially.

J. F. Collins.

J. FRANKLIN COLLINS  
468 HOPE STREET, PROVIDENCE, RHODE ISLAND,  
U. S. A.

9 May, 1904,

Dear Mr. Kennedy: Your letter just received. It ought to have been here <sup>Saturday</sup> I have no recollection of what you said as you left the meeting Friday eve.

As it happens the first I knew about your taking the map back home was when Dr. Robinson started to leave the Club. I noticed that he had no package which would allow a piece of paper as large as the map in it. Thinking that perhaps he had forgotten it I asked him (by way of a reminder) if you gave him the the map. He replied that you had taken it back home to look it over ~~for~~ a little more carefully and see if there was any more changes that you thought ought to be made.

I concluded that you had learned that you had more time than you suspected at first and omitted the subject from my mind.

I know it is very difficult to construct a map that will be at all satisfactory without actually going over the ground. Even then

some people who have preconceived notions as to distances will question the measured results, as was the case a few years ago when I made a map of the Rome Pond region in Me. I made a pencil map of the region as the result of a plane Table survey which I made. I fully satisfied everybody at the camp as to the size and area of the pond ~~except~~ one of the gunders. He was shown to ~~be~~ have greatly overestimated the pond. I made the "survey" as the result of a dispute as to the size of the pond.

I wish Willoughby was not so far away. I would like no better for them to make some measurements in the region myself.

If you ~~do~~ go up there a good scheme for measuring distances is to tie a white cloth to a wheel spoke (near wheel) of a carriage and have some one count the revolutions between corners, cross roads, <sup>(of course carefully according to circumstances)</sup> tracks &c., & roughly - (at least - (carefully if possible)) measuring angles at all turns.

Government surveys even to the present day adopt this method sometimes.

Considerable scratching can yet be done on the maps. I understand just how you feel about publishing the maps, and fully sympathize with you. Cordially. J. F. C.

PROVIDENCE, R. I., U. S. A., ..... 27 Sept., 1904

Dear Dr. Kennedy:

I want to thank you  
ever so much for the "Glean of Wiloughby"  
which has just come to hand.

I am very glad to get it.

Mr. Fernald was down here last evening  
and we were talking over the prospect of making  
 lantern slides to illustrate our Gaspe' trip  
and giving an evening on the topic at  
the Club sometime during the winter.

I brought home about 350 <sup>Canadian</sup> photos and Fernald  
probably over 200; although all of them are  
by no means good for lantern slides, we think  
we can ~~get~~ pick out 50 or more that will  
do for illustration. Consequently I am  
now experimenting on lantern slides—a new  
departure for me in the line of photography.

I hope to see you at the Club meeting.

I suppose you are yet at Wiloughby but will  
direct this to Revellville, not knowing where  
you will return. My regards to Mrs.  
Kennedy and yourself.

Cordially, Franklin Collins

Jan. 23, 1905

Dear Sir:

The botanist to whom I referred is Mr. J. Franklin Collins, Curator of the Herbarium of Brown University, Providence, R. I., and whose home address is 468 Hope St., Providence. Mr. Collins is thoroughly acquainted with the mosses of New England, and is better able to name them over offhand or after careful examination, than any other botanist I know, except Professor Farlow, who of course we all recognize as our teacher in cryptogamic botany.

In collecting mosses, it is absolutely necessary to have the specimens carefully selected, free from dirt, or extraneous substances, and laid out in a careful manner under gentle pressure, so that when dried their general outline may not be disturbed, and then by soaking in water, they easily resume their normal appearance, and can be examined as fresh specimens. These dried mosses, placed each one in its own separate envelope, form a herbarium of reference for the student of mosses, and a student's work is much facilitated if the collector uses this care in obtaining his specimens.

Yours truly, SSK

To Louis A. Stillings  
205 St Botolph St Boston

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY

W. WHITMAN BAILEY  
6 CUSHING STREET

J. FRANKLIN COLLINS  
468 HOPE STREET

PROVIDENCE, R. I., U. S. A., 12 Feb. 1905

Dear Dr. Kennedy :-

The mosses came yesterday and from a hasty examination I think it is likely that I shall keep most of them.

I thank you ever so much for them.

I cannot help you much in regard to who Geo. E. Hunt was.

I have seen many of his specimens in *Cryptogamic Herb.* at Harvard.

In 1866 he published "The mosses new to Britain" I think quite likely he was one of the oldest British collectors and may not be living now.

With kind regards to you and yours

Very truly

J. Franklin Collins

DEPARTMENT OF BOTANY

W. WHITMAN BAILEY  
6 CUSHING STREET

J. FRANKLIN COLLINS  
468 HOPE STREET

PROVIDENCE, R. I., U. S. A., 7 Mar. 1905

Dear Dr. Kennedy:-

The box of genres  
covers came yesterday afternoon.  
I did not expect quite as many covers  
yet if these are about a third of them  
and you are really going to throw them  
away I will still say I shall be  
glad to get them. Many thanks  
for them. If you had not  
forewarned me in regard to the box  
I should have been somewhat surprised  
in regard to it. I should think  
that the sphagnum packed in it could  
not have come to any harm during  
transit. That reminds me, I  
have got a *Sphagnum* in which I  
have been working and puzzling for  
some time that has been passing for  
*S. macrophyllum*; but after studying  
available material here in Providence  
I fail to make it agree (in several

particulars) with descriptions of that species. I wonder if I could examine such material as you have of this species. Especially any authentic specimens or any N.E. material. My specimens on which I am at work have been named S. macrophyllum by Andrews and were coll. in R.I. & Me.

If really S. macrophyllum here is an interesting extension of range to say the least.

Very truly  
J. Franklin Allen.

BROWN UNIVERSITY  
DEPARTMENT OF BOTANY

W. WHITMAN BAILEY  
6 CUSHING STREET

J. FRANKLIN COLLINS  
468 HOPE STREET

PROVIDENCE, R. I., U. S. A., ..... 10 Mar. 1905

Dear Dr. Kennedy

Thank you very much  
for the Sphagnum macrophyllum. As  
soon as I get time I shall examine it  
carefully.

So, I think it would  
not be surprising to find S. macrophyllum  
in R. I.

The trouble with my  
R. I. plant is that I cannot seem to  
match it with what I consider typical  
S. macrophyllum.

It seems to vary  
more from that species than do some of  
Warming's species of Sphagnum from each  
other.

If further critical study  
does not modify my views I think I shall  
have to describe it as a new species or variety.

Very truly

J. Franklin Collins.

J. FRANKLIN COLLINS  
468 HOPE STREET, PROVIDENCE, RHODE ISLAND,  
U. S. A.

8 Apr. 1905

Dear Dr. Kennedy:

You got away from  
the Club last evening before I had  
a chance to thank you for your  
hospitality which I had intended to  
do, so I will do it now.

The title of the Migula book is  
"Kryptogamen - Flora von Deutschland,  
Deutsch - Österreich und der Schweiz"  
By Dr. W. Migula. - Band I. Moose  
Published by Frederick von Zegschwitz  
Gera, R., Germany

Dr. Braithwaite's address on the last Moss Flora  
pamphlet is "26 Endymion Road, Brixton Hill,  
London.

Very truly

J. Franklin Collins.

The Migula cost me M. 17. + M. 2.20 for post.

J. FRANKLIN COLLINS  
468 HOPE STREET, PROVIDENCE, RHODE ISLAND,  
U. S. A.

12 Apr. 1905

Dear Dr. Kennedy:

I sent a postal note along with my order and had the book come direct, by mail. I often do this way.

"Gera, R., Germany" means Gera, Reuss, Germany. — "Reuss" being a county, province, or "duchy", or something of that sort.

There is no duty on books printed in foreign (or dead) languages nor on books in English if over 30 years old.

I have often been obliged to get books through the custom house but have never yet been obliged to pay any duty on the same.

Sometime, I should like a bit of the printing "sticker", but if it is all the same to you I would appreciate it a little more, perhaps, after Dr. Farlow reduces the adhesive properties. I already have a goodly pile of persistent "stickers" on hand.

Cordially,

J. F. C.

PROVIDENCE, R. I., U. S. A., 24 Aug. 1906

Dear Dr. Kennedy

Only a few lines to let you know that the East's expedition was carried out almost exactly as planned and we are back home again. Fernald, I presume, is in Urono for 10 days before returning to Cambridge. We spent the first week of July at Bic, living to Str. "Gasparien" accident (which occurred in Montreal) we drove from Little Metis to Ste. Anne des Hauts, arriving there a day ahead of schedule. We started up the river the next day (July 13) and reached the foot of Mt. Albert (the trail) about 1 p.m. July 17. From the 18th to 28th we were on Mt. Albert. On the 26th we went Côte' (our head guide) and another man down the Mt. to cut a trail to Sabletop Mt. On July 31 we ~~int~~ went over this trail to base of Mt. ~~XXXX~~. (10 miles in 9 hours). Three days later

we moved camp up on to the det. proper  
about  $3\frac{1}{2}$  miles further, to E. fork of Ste.  
Anne River. (alt<sup>(?)</sup> 3450 ft.) This was our  
main camp on Dabletop. On the  
9th we took a three days trip to eastern  
edge of the mountain. We returned to the  
river Ste. Anne on Aug. 14, spent the 15th  
at the falls and gorge  $\frac{1}{2}$  mile up river -  
and reached Ste. Anne des Hurts on the  
17th after an absence of 5 weeks and 1 day.  
Dabletop is a hard mountain to reach  
and the greatest place for sphagnum  
that I ever saw. Gerald got lots  
of nice things - many more than last  
year I think - and I have a good  
many mosses from both Albest and  
Dabletop. I think you will be inter-  
ested in these when I get them organized.  
I also got lots of photographs - or I  
hope I have, for I have not yet developed  
any as I only got home yesterday afternoon.  
I hope I have enough to work out a good  
map as there seems to be no good ones  
in existence so far as I am able to  
learn. I hope you have had a  
pleasant summer and a profitable one

My regards to the members of your  
family. Sincerely, J. F. Collins.

PROVIDENCE, R. I., U. S. A., 30 Oct. 1905

Dear Dr. Kennedy:-

I understand you have returned from your European trip with pleasant memories of a delightful summer.

I hope my informant was correctly posted. I hope we shall have a chance to exchange tales at next Club meeting. My kindest regards to Mrs. Kennedy.

I am sending at this time a special set of our "Plants of Eastern Quebec" of 1905, via express, with the compliments of Mr. Fernald and myself. I hope the plants will reach you in good condition and prove that the snow, the ice, and the black flies of Mt. Albert did not drive us off the mountain until we dug some specimens.

Cordially,

J. Franklin Collins.

Plants are addressed to "Rosedale".

BROWN UNIVERSITY  
BOTANICAL DEPARTMENT  
PROVIDENCE, R. I.

J. Franklin Collins, 468 Hope Street

10 Sept. 1907

Dear Dr. Kennedy:

As you know, I am  
no hand to write letters when I am  
not obliged to do so.

I heard last spring that there was  
some prospect of Mrs. Kennedy, Mr. Meldred  
and yourself joining our Gube' party,  
and I was much pleased over the  
intelligence. I did not learn of  
your change of plans until shortly  
before we started. Am sorry you  
were not with us as we had a  
profitable summer notwithstanding the  
fact that, for the first time, we experienced  
the much prophesied St. Lawrence weather.

I presume Mr. Fernald has already told  
you of the trip and of many of its

more salient incidences.

I hope you have had a pleasant summer, or shall I say "still having" a pleasant summer - for I do not know that you are back yet, although I think you are (or have been) from a remark of Mr. Fernalds.

Since my return I have been busy with photo. films. Most of them have turned out pretty well but the back ones always appear along with them.

Mr. Williams told me in the spring that you did not feel well enough to attend the Club meetings. I hope you will not feel that you must neglect us the coming season, which is an indirect way of expressing the wish that your summer has improved your health to such an extent that we shall see you at all this winter's meetings.

With kind regards to Mrs. Kennedy and the rest of your family as well as yourself  
Very truly, J. Franklin Collins.

J. FRANKLIN COLLINS  
408 HOPE STREET, PROVIDENCE, RHODE ISLAND,  
U. S. A.

16 Sept. 1907

Dear Dr. Kennedy:

I am very glad that

you have had a pleasant summer  
and that you are all in good  
health, and I shall be delighted  
to have you down here for a day,  
or longer. We can look  
over noses, photographs, or  
take a run out into the country  
somewhere, or anything else  
that we want to when you get here.  
Sometime this week would be  
the most convenient for me as  
college opens next <sup>week</sup> Wednesday (25th)  
and after that my time will be

uncertain, but very largely taken  
into at the elect. I presume.

If you will let me know when  
to expect you I will meet you  
at the station as one of our  
principal East side streets is  
torn up and cars are running  
"any old way". We never know one  
day, how they are going to run the  
next.

If you prefer to telephone we have  
an instrument in the house now;  
it is "Angell 1105-R"

I hope you can get the Blue Hill  
observer to give you a coal day  
for the trip although it is not so  
very bad up here on top of this hill.

Cordially

J. Franklin Collins

BROWN UNIVERSITY  
BOTANICAL DEPARTMENT  
PROVIDENCE, R. I., U. S. A.

J. FRANKLIN COLLINS, 468 Hope Street

Apr. 11, 1909

Dear Dr. Kennedy:-

Thank you for the correction of Robur, which error had been overlooked. I hope you will keep marginal tabs on any other errors that you may notice and let me know, later, what they are. The printer has been guilty of many errors but in this particular case he is guiltless.

I, too, have done very little work on the mosses for some time, in fact all the winter. I hope we can get out together on another tramp in Rhode Island before summer. Whenever I go up to Boston I am apt to gaze over the Neponset River marshes to Blue Hill, and as a result I believe I am developing a strong desire to climb the hill again in the near future. Perhaps I may do so before another summer passes, though, judging from the amount of work piled up in front of me, it will not be in the next two or three weeks.

My regards to Mrs. Kennedy and the rest of your people.

Cordially yours,

J. F. Collins

BROWN UNIVERSITY  
BOTANICAL DEPARTMENT  
PROVIDENCE, R. I., U. S. A.

J. FRANKLIN COLLINS, 468 Hope Street

May 7, 1910

Dear Dr. Kennedy:-

I am sending ~~under~~ another cover a pamphlet which may be of some interest to you. I would like to ask if you think the last statement on page 8 is true. I question it. You will find the measurement of this pine on page 15.

I have already proved that Mr. Mowry's ~~is~~ statement at the bottom of page 17 is untrue, as I have recently measured two pitch pines in R. I. which are larger than the one mentioned, at least in girth.

I hope you are all well and enjoying life in Milton.

I have been up to the Arboretum today looking over the chestnut plantations for the disease. Am glad to say that I found none, the tree infected in the winter having been cut down.

Cordially,

*J. Franklin Collins*

BROWN UNIVERSITY  
BOTANICAL DEPARTMENT  
PROVIDENCE, R. I., U. S. A.

J. FRANKLIN COLLINS, 458 Hope Street

May 29, 1916.

Dear Dr. Sargent:-

Your letter of the 18th of May came in due season. Within a few days after it came Mr. Brewster and I had planned to go out to Chagrin and spend our 15th time. Mr. Brewster tried to get you on the long distance telephone, but you were away for the day and he telephoned. He wanted to tell you about our planned trip for the following day and see if you and Mr. Lichen could

manage to join us. As it fell and it rained and we did not go. Since that time I have been unable to do any close bot for such a long while and, as I have not written you. At the present time it looks as if I could go out with you on either Thursday, June 2, or on Monday, June 5. Are either of those dates satisfactory to you and Mr. Fernald?

Chagrin is in the <sup>we</sup> north-eastern part of the state, about an hour's ride from Providence <sup>to Oakland.</sup> Trains leave Providence at 8.40, 9.40, and 11.45 a.m., for Oakland, the nearest R.R. station. The tree is about 3 miles from the station. Trains return at 12.55 and 4.35 p. . On and after June 6 I should arrange to go out with you almost every day, if I knew about it a few days ahead of the time. I do not expect to start on my summer's work until the latter part of June or the first of July, so <sup>possibly</sup> I can get up to Newville some time in June. I don't know yet whether I shall remain about Providence during the whole of June.

Am glad to hear that you are all in good health. We are about as usual here.

Cordially, J. F. Collins.

468 Hope Street,  
Providence, R.I.  
Apr. 26, 1911.

Dear Dr. Kennedy:-

I am filling out a blank application in connection <sup>with</sup> government work on the chestnut bark disease. I am filling out a more elaborate blank than usual, hoping that I may thereby improve matters for myself. There is one place where I have to give the names and addresses of five persons who have knowledge of my "character, experience, and ability". Are you willing that I should use your name as one of these?

I was very glad to see you at the American Academy meeting. It was a delightful affair, including the dinner in the evening. I hope you are enjoying the best of health. These last few pleasant days seem like real spring.

Cordially,

J. Franklin Collins.

ans  
yes

468 Hope Street,  
Providence, R.I.  
Apr. 30, 1911.

Dear Dr. Kennedy:-

Thank you very much for the permission given in your letter. The names which go along with yours are those of Fernald, Rand, Collins, and a Mr. Miller of Providence. On another plank which also required five names I decided to use different ones, although the same five would have answered, and inserted those of Dr. Robinson, Dr. Riddle, Dr. Metcalf, Mr. Chamberlain, and a Mr. Arnold of Providence,

It looks as if spring had really arrived within a few days. Quite a number of trees have their young foliage, the Norway Maple is in bloom, as well as Houstonia, Viola, Nepeta Glechoma.

Cordially,

J. F. Collins.

468 Hope Street,  
Providence, R.I.

July 18, 1911.

Dear Mr. Kennedy:-

Some time ago you expressed an interest in the future outcome of the Civil Service examination which I took some time ago. A few weeks ago I received word from the Civil Service Commission that I had passed the examination with an average per cent. of 96. The only thing that prevented me from getting 100 was the fact that I had not had a college education.

On the 8th of this month I received an appointment of "Forest Pathologist" in the Bureau of Plant Industry, and have resigned my position here at Brown to take up the new position. This is not public knowledge yet, though there is no need of keeping the fact quiet so far as my botanical friends are concerned.

I leave for New York tonight. My permanent address will be the same as usual for some time to come I presume.

Very truly yours,

*J. Franklin Collins*

468 Hope Street,  
Providence, R.I.

24 Jan. 1912.

Dear Dr. Kennedy:-

I received your kindly Christmas Greeting several weeks ago while I was in Washington. I was there to attend the American Association meetings and also a series of conferences which had been called for all men connected with the Office of Forest Pathology. These conferences extended over nearly or quite four weeks, much longer than we (had) any of us anticipated. They were very profitable conferences for all of us, however, as each man took up in turn his own work, explaining it to the others; the others in turn criticising, suggesting, or questioning, from their own point of view. All the men connected with the office were on hand, including four from Washington or eastward, as well as the western men from Nebraska, Montana, Wisconsin, California, and New Mexico.

I shall be very glad to tell you more about the work at some time in the near future, I hope. I shall be very glad also to lunch with you at the first opportunity. I trust we can arrange a mutually satisfactory date before long.

I returned from Washington only last Sunday evening. I now expect to be in Providence most of the time until I go into the field again, probably three or four months hence.

Father cannot see very well now and is becoming very deaf. Mother is not able to get out very much, especially since freezing weather arrived. Otherwise things move on about as usual with us.

We all extend the heartiest greetings of the season to you and yours.

Cordially,

J. F. C.

J. FRANKLIN COLLINS  
468 HOPE STREET, PROVIDENCE, RHODE ISLAND,  
U. S. A.

December 31, 1914

Dr. G. G. Kennedy,  
Readville,  
Mass.

Dear Dr. Kennedy:-

I have been hesitating a little about writing you, thinking it might be possible at the last moment to arrange to make you a short visit tomorrow, but I shall have to abandon the idea.

I found that I could leave here at 9 a.m. (via Wrentham and ~~Norwood~~) and reach Hyde Park at 10.31. If this station would be convenient I might work this arrangement sometime in the future. At your convenience please let me know if Hyde Park would be accessible, and the best way of getting from there to your house.

No special hurry as I expect to start in a few days for a month's trip along the coast states from North Carolina to Louisiana, looking up shade tree troubles.

My address during the trip will be "C/O  
Forest Pathology, Bureau of Plant Industry,  
Washington, D. C."

HAPPY NEW YEAR.

Cordially,

J. F. C.

468 Hope Street,  
Providence, R.I.

Mar. 29, 1915.

Dear Dr. Kennedy:-

About January 1st we were planning a little, I believe, for my making you a visit on some Club-meeting day. It occurs to me that there is a possibility that I may have the time to make such a visit on next Friday (April 2), although I cannot say definitely for a day or two. Would this date be perfectly agreeable and convenient for you in case I can arrange my plans on that basis? Also, would it be perfectly satisfactory in case I made the trip if I went up on the train due at Hyde Park about 10:30 a.m.? I presume this train is still on the schedule, but I will make sure of this point before sending you definite word.

If for any reason some other date would suit you better please do not hesitate to say so. Of course there is the possibility that I cannot make the trip <sup>the date is</sup> even if/perfectly satisfactory to you.

I hope you have been enjoying the best of health since I last heard from you.

Cordially,

*J. Franklin Collins*

United States Department of Agriculture,  
Bureau of Plant Industry.

Forest Pathology.

Brown University,  
Providence, R. I., Aug. 22, 1911.

Dr. George A. Merrill,  
Newville, Tenn.

Dear Dr. Merrill:

Dr. Merrill paid a visit to the Bureau of the United States  
Department of Agriculture at the District Office of the White Pine, New  
Hampshire, where he was in charge of the laboratory and will probably be  
back in a few days. He is a member of the New  
England Entomological Society of Vermont. It is possible  
that you may have met him, but I do not think so.

Dr. Merrill was in looking over the files of "Insects" in search  
for localities of different species of flies, Dr. Spaulding recently  
submitted, as he said to try an illustration of a fly article in the June  
1911 issue, that he had always been interested in articles on the  
White Pine and wondered if there were any specimens of your  
illustration article ever saved. I told him that we had some  
at the time, but I did not know if there were any left, but felt  
sure if there were any available that you would be only too glad  
to give them to him. I am not sure but that I have been  
showing our friendly relations in giving such a statement to him,  
without first consulting you, but I hope not.

By the way, Dr. Spaulding and I are planning to a you

[...]

General, I am writing you to inform you that I am planning to visit you in the near future. I am planning to visit you in the near future. I am planning to visit you in the near future.

I hope you and all your family have been enjoying good health and I am happy for you.

With best regards,

Sincerely yours,

...

## REAL ESTATE CORPORATIONS.

---

Address by Hon. George G. Crocker at the Annual  
Dinner of the Real Estate Exchange,  
March 11, 1903.

CHAPTER 123 of the Revised Laws authorizes five or more proprietors of wharves, of real estate held in common, or of general fields, to form a corporation for the better management of their estates. Laws of like tenor were passed early in the eighteenth century. They have been amended from time to time, notably in 1783, but they are still in such crude shape that they are of little or no practical value. Some such corporations, organized long ago, are, however, still in existence.

With the above exception there was, prior to 1851, no general law providing for the organization of corporations for any purpose whatsoever. A special charter was needed in every case. In that year, 1851, an act was passed authorizing the formation of corporations for manufacturing, mechanical, mining and quarrying purposes, with a capital stock of not less than \$5,000 nor more than \$200,000. As business interests have increased in size, variety and number with the growth and commercial development of our State, the importance, I might almost say the necessity, of regulating them by general laws rather than by special charters has been forced upon the attention of the General Court.

To enact general rather than special legislation, when such action can be taken without detriment to the public interest, is now a well-recognized policy, which for many years has found expression in the rules governing the reports of legislative committees.

At the present day, trust companies, mortgage loan and investment companies, and savings banks are still organized under special charters, though it is at least questionable whether they might not be organized under general laws. With this possible exception, a corporation can now be organized under general laws for any lawful business except that of an innkeeper, of distilling or manufacturing intoxicating liquors, or of buying and selling real estate.

The limitations as to the amount of capital have been broadened from time to time and vary according to the business to be transacted. The lower limit is \$1,000. The upper limits vary from \$5,000 to \$1,000,000, but mechanical and manufacturing corporations are permitted to increase

their capital stock to such amount as may be fixed by the stockholders at a meeting called for the purpose. (Revised Laws, Chapter 110, Sections 4-13, and Section 31.)

Note now the kinds of business which are barred from the privileges of the corporation law. A corporation can be organized for the purpose of erecting and maintaining a hotel, but not for the business of an innkeeper. Sometimes innkeepers fail to take sufficiently good care of their guests, but they always seem to be abundantly able to take care of themselves, so that it is not necessary to consume your time in considering their disabilities. What will interest you is the consideration of the reasons why the business of buying and selling real estate is classified in the same proscription with the business of distilling and manufacturing intoxicating liquors.

Now, gentlemen, you know something about buying and selling real estate. It is your business to encourage trade in real estate. Is there something wrong about it? Real estate brokers always make a good appearance, always talk smoothly and entertainingly, and they are always very anxious to promote the interests of their customers. Is it not true that as a class you stand pre-eminent in the community in these respects? What is the reason that the Legislature looks with suspicion upon this business which you are promoting?

A commission on the revision of laws relating to the formation, conduct and taxation of corporations has this year made a report to the Legislature in which it is stated incidentally that it has been the consistent policy of this Commonwealth not to permit the organization under general laws of corporations for the buying and selling of real estate. Is this policy founded on reason or on prejudice?

There are in existence in this State at the present time some forty or fifty companies which may be classified as real estate corporations organized under special charters. As a rule these charters have fixed the limit, either in quantity or by location, of the land which the corporations may hold; the amount of capital stock has been limited, and also the life of the corporation,—such life in most of the charters granted in late years being limited to a period of twenty-five or thirty years. Most of these corporations now in existence will die within the next twenty years, unless reanimated by legislative act. To this general statement there are some exceptions, notable among which is that of the corporation known as the Fifty Associates. The act under which this corporation was organized was entitled "An act to incorporate the proprietors of Museum Hall in the Town of Boston," being Chapter 138 of the Acts of the year 1819. This act authorized Benjamin Rich, John Hurd, Jr., Shadrach Shattuck and Alpheus Carey to organize a corporation with authority to hold in fee simple or leasehold a lot of land in Boston between Elm Street and Cooper's Alley, having a frontage of 180 feet and a depth of 260 feet. The corporation was given power to buy, sell, lease, manage, improve, pull down, rebuild, etc. The capital stock was divided into shares not exceeding 600 in number, which were "in all respects and at all times to be held as personal estate." The total assessment per share was limited

to \$200. It was provided that each proprietor should be entitled to one vote for each share held by him, but not to more votes than would "be equal to one-third in value of the corporation property." Voting by proxy was permitted.

By Chapter 15 of the Acts of the year 1823 the name of this corporation was changed to "The Fifty Associates." Authority was given to increase the number of shares to 1,000, and the limitation as to the quantity and location of real estate which the corporation could hold was removed. The limit of capital of this corporation is, therefore, 1,000 shares, of the par value of \$200, or in all \$200,000.

The real estate of this corporation, in the year 1900, was taxed for \$3,753,900. This great increase has been the result of judicious investment and re-investment, of the natural increase in value of real estate with the city's growth, and also of the accumulation of undivided earnings. A share of this stock to-day sells for about \$5,000.

Of the charters which have been granted of late years, that of the State Street Exchange (Statutes 1888, Chapter 82) is probably the most liberal. The land which this company can hold is limited to the area bounded by Congress, State and Kilby Streets and Exchange Place; the life of the corporation is not limited, and it is allowed a capital stock of \$3,500,000. It appears that the land and buildings have cost about \$6,000,000.

The objections to the organization of real estate corporations were probably never better nor more forcibly stated than by Governor Butler, in 1883, in the veto of a bill which extended the time allowed by an act of a previous legislature for the organization of the Somerville Wharf and Improvement Company. One of his principal objections was that the corporation would have the right to hold in perpetuity, and that such land-holding, in the language of the books, would be a holding in *mortmain*, or by the dead hand. We can better understand the force of this objection if we inquire into the origin of the term *mortmain*.

Under the feudal system in England the rendering of service and duty to a superior lord and to the king was a necessary incident of land ownership by an individual; but when land was conveyed to a religious corporation it was thereby discharged from such feudal service. For this reason, and, also, because such lands were unalienable, that is, they could not be conveyed away by the corporation after they had been received by it, it came to be considered that such lands were held by the hand of the dead, or by *mortmain*. As years rolled on, the amount of land given to religious societies, and which was thus tied up and exempted from service, became so great that Parliament interfered by limiting or prohibiting such gifts. The term *mortmain* was therefore originally used in connection with gifts to religious corporations, but in England the term is now used as applicable to an alienation or conveyance not only to ecclesiastical bodies, but to any corporation, sole or aggregate, ecclesiastical or temporary.

In Shelford on Mortmain it is stated that the laws now in force in

England prohibiting corporations from holding lands in mortmain without license are founded upon the same policy as the rule against perpetuities, to prevent lands from being withdrawn from commerce and rendered unalienable.

It is undoubtedly true that large tracts of land in England were tied up, taken out of the market, and rendered practically unalienable, not only by gifts to religious societies, but also by their law of primogeniture and entail, from both of which England has suffered. But the conveyance to a corporation having power to sell, as all corporations in this country do, such conveyance being made subject to no trust requiring the corporation to hold the land for any definite period, does not tie up land or withdraw it from the scope of your activities. Nay, more, in some respects a conveyance to a corporation is more likely to bring land into public use than a conveyance to an individual. An individual may keep land in an unproductive state merely to promote his pleasure. A corporation will hold land for the purpose of deriving income from it, and that income can only be secured by devoting it to some use advantageous to the public.

In the report made by the committee to which Governor Butler's veto was referred, Hon. George A. Bruce being the chairman of that committee, I find the following: "Men, and corporations more universally than men, use their possessions so as to make them profitable. There is no fear that land will be withdrawn from the use of the public."

A corporation does not want to have its land tied up. It wants to have the privilege of selling as well as of buying land.

It is a common law principle that, except for public charities, land cannot be tied up so as to be unalienable for a longer period than a life or lives in being and twenty-one years after. This is known as the rule against perpetuities. It applies to corporations as well as individuals.

Can land which is held by one of our corporations be properly said to be held in mortmain, or by the dead hand? Such land is not unalienable, neither is it exempted from any public burden to which the land of individuals is subject. The Legislature determines the length of life of corporations. The life of those organized under general laws is not limited. So long as the Legislature permits a corporation to live, its ownership of land is very far from being without life. It is peculiarly full of life and activity. Not only can the corporation make conveyance of its land or any part thereof whenever its stockholders desire, but each one of those stockholders by selling stock can at any time transfer his interest or any part of his interest in the property of the corporation, real as well as personal. Mortmain is a gruesome word and, if used to describe the corporate ownership of land as such ownership exists in this State, it is misleading.

In the veto to which reference has been made, Governor Butler wrote that "all monopolies are bad enough, but of all monopolies, that of land on which men are obliged to exist is the worst." This is a terse and forceful statement, but it is hard to conceive of a monopoly of land resulting from

a general permission to any combination of citizens to form corporations, with a capital stock limited as the Legislature may determine, to be managed under proper regulations devised by the Legislature, and to be under the supervision of the State.

It was stated by Governor Butler that "every possible restriction upon the sale and division of lands should be removed so that all can be thrown on the market for sale in order that mechanics and laboring men employed in the city can find cheap lands on which to build homesteads."

In this connection it should be remembered that to prepare a large tract for the market by filling up marshes, by levelling hills, by laying out streets, etc., so that the land can be available for such homesteads, is one of the principal purposes for which the incorporation of land companies has been desired. If the organization of such corporations was authorized by general laws, such would still be one of the main purposes which these corporations would have in view. They would also be organized for the purpose of combining into one body several estates which, owing to smallness, or shape, conflicting easements, or other reasons with which you are only too familiar, cannot be profitably improved separately, but which by combination immediately acquire a greater value, can be adapted to furnishing better service to the public, will bring in a larger return, and will be of greater taxable value. The estates in Boston which could be combined in this way under corporate management to the advantage both of the owners and of the public are numbered by the thousands. Look along Washington Street and you will see building after building, 25 feet or so in width, which cannot profitably be improved because staircases and elevators would take too large a percentage of the space and profits. The owner of one of such adjoining properties does not wish to sell to either of his neighbors and thereby part with a safe investment with which, perhaps, he has cherished associations, and yet he would be willing to combine his property with that of his neighbors under a corporate management, each one taking his fair share of the stock of the company to represent his proportionate value of the combined estates. Again, even if one owner were willing to sell, his neighbor might not be rich enough to buy, and if he were rich enough to buy, he might not be rich enough to erect a suitable building covering both properties.

It is only very rich men who are able to erect large buildings in the heart of the city. They have, indeed, a monopoly of this business. The men of ordinary means cannot compete with them, for the reason that the law does not enable men of ordinary means to combine under corporate organization, and thus by contributing many small amounts to create a large fund.

It is extremely desirable for the promotion of good government that the poor as well as the rich should have an interest in real estate. The policy of the law has been to bar them from such interest. If, however, land companies could be organized under general laws, the man having a hundred dollars to invest might purchase a share of stock in one of these companies. He could purchase a share whenever he had laid up a

hundred dollars or so. He would thus have an interest in real estate. He would be more watchful to detect and more active to prevent municipal mismanagement and extravagance. He would be likely to be a better citizen.

It may be urged that there is no necessity for providing for the incorporation of land companies under general laws, for the reason that the purposes of such companies can be well accomplished through the instrumentality of real estate trusts.

Since the case of *Henry S. Howe et al., Trustees, v. Charles W. Morse et al.* (174 Mass. 491) was decided in 1899 by our Supreme Court, these real estate trusts have been created with great rapidity.

The following is an extract from the decision rendered by Mr. Justice Barker in this case:

"Such a trust for the convenience of an unincorporated association in renting and selling land, under which the land is held for no other purpose, and where the income is not accumulated, but is distributed as it accrues, and where the land is to be sold free of trusts at the will of the association, and where the whole equitable interest in the trust is at every moment vested absolutely in those who at that moment are shareholders, and never can become vested in any other persons save by act of the absolute owners or by operation of law upon their property, and not by force of any limitation contained in the deed of trust, the equitable interests so vested being also constantly vendible by their several owners without let or hindrance, as well as subject to their debts and passing like other property upon death by virtue not of the deed of trust but of the general laws governing the disposition of the property of decedents, withdraws no property from commerce, and is not within the reason or the terms of what is called the rule against perpetuities. The trust involves no future limitations, no restraint upon alienation, and no accumulation either of income or of principal."

In the list which is issued by Burroughs and DeBlois nearly sixty of these real estate trusts, all holding property in Boston, are mentioned. There are quite a number not mentioned in this list, their stock not having been put upon the market. Those included in the list represent investments of over \$60,000,000, or an average of about a million apiece. As a result of their formation, grand buildings have been or are being erected, especially in the heart of the city. The interest of a subscriber is represented by share certificates in the same way as the interest of a stockholder in a corporation is represented. The real estate is held by a title as absolute and continuing as that by which a corporation holds. These trusts seem to be open to all objections which can be raised against land companies, and they are also open to some other and perhaps serious objections. In the first place, there is no limit to the amount of capital which these trusts can hold. If there is any objection to large consolidations of capital, that objection obtains as against the possibilities of these trusts. This must not be considered as an intimation that any such objection is valid. Again, these trusts in the issue of their stock and in their general management are not subject to any State supervision or regulation. Again, each one of them is based upon its own peculiar deed of trust. It is doubtful whether any two of these deeds are exactly alike

in their provisions. They are all lengthy documents. The rights of a stockholder under one trust will be different from his rights under another, and it will be a wise man, indeed, who after studying up one of these trust indentures will know what his rights are; and a man with extraordinary memory who will be able the next week to state his conclusions.

These deeds of trust contain provisions intended to protect the shareholders from personal liability for debts contracted by, or damages caused by the act or neglect of, the trustees. To what extent these intentions have been successfully carried out will be determined from time to time by our Courts.

How much simpler and safer it would be if the properties now held by these trustees had been conveyed to corporations organized under general laws. There would be no declaration of trust, each sentence of which may be the subject of a law suit. The law would determine the method of organization, would by uniform regulations govern the methods of administration, the powers of the corporation and the rights and liabilities of the officers and stockholders. The capital stock would be limited to such amount as the Legislature in its wisdom might deem necessary to prevent any possible monopoly. The management would be subject to the supervision of the State, and the stockholders would have the benefit of that publicity which it is one of the chief objects of State supervision to secure.

As before stated, the question of a revision of the laws relating to the formation, conduct, and taxation of all corporations except municipal, banking and public service corporations, is now being considered by the Legislature. If the proscription which has hitherto existed against corporations for the buying and selling of real estate is not well founded, now is a good opportunity, perhaps the best opportunity which will arise for many years, to have the law changed.

As a rule, desirable combinations of several estates and their proper development and improvement can only be carried out by the use of large amounts of capital. If carried out, they will promote the public welfare, and they will increase the amount of taxable property.

Shall these works be barred unless some Morgan sees fit to undertake them? Shall they be left to the very rich as their special preserve, being protected from the competition of the combined capital of poorer men by this exclusion of the business of buying and selling real estate? Shall these works and the profit to be derived from them be reserved for the very rich and for those who are able to secure a special charter from the Legislature? Or shall all our citizens have a chance at them under general laws, catholic in their nature, granting no special and exclusive privileges, but only those which all alike can avail of, and so creating no monopoly, but permitting the men of small means, by combining their capital, by union of their mites, to compete with and enjoy the same opportunities as are now exclusively the opportunities of the rich and those few who from time to time are favored by the Legislature with grants of special privileges?

My dear Frank

Having made a diary of our trip thro'  
Mass, and having an extra copy, I send it to  
you thinking that you may be interested in it.  
Tear it up when you no longer wish to keep it.  
Perhaps you can fill some blanks which I have left. If so,  
please send me a memo. I hope you are all right again.  
Yours George G. Crocker

Thursday, June 10th, 1909, the Class Club assembled at Will's house a little before two o'clock. We had our auto and Prentiss Cummings' new Pierce Arrow car. It looked like rain and the Weather Bureau said that there was to be rain. Will and Frank went in Prentiss' car, and Henry and George Kennedy and I in mine. We left at two o'clock and went by way of Newton Centre, where we saw the lot on which Frank once lived and entertained the Club, Weston, Wayland, Bolton, Stow and North Lancaster, then South through Lancaster to Mr. Nathaniel Thayer's house. It began to rain just before we reached North Lancaster and when we arrived at Mr. Thayer's house it was pouring. Will went up to see Mr. Thayer, who was confined to his room, and Mrs. and Miss Thayer very cordially entertained the rest of us, going so far even as after furnishing us with umbrellas, to go out with us in the rain and walk over the lawns to get a view of the rhododendrons.

We reached the Thayers at eight minutes past four and left at about quarter of five. Then we went down and saw the dam of the Wachusett Reservoir at Clinton, both at its base and on its top, and then went down along the reservoir on its East side and across its Southerly end to Oakdale and from Oakdale by the straight road up to the Wachusett House in Princeton, which we reached at about seven o'clock.

The rain continued well on into the evening. The road from Oakdale to Princeton was very wet and slippery and we probably could not have got up the hill had not Burke put on the chains while we were stopping at the dam.

Prentiss' car succeeded in getting up the hill without chains, he having omitted to bring any with him.

Distance travelled, 100 miles.

Friday morning, the 11th, we awoke to find the wind from the Northwest but the clouds looking very wet.

Henry left us shortly after eight o'clock, a car of his Commission having come up for him, and he left in it for Clinton where he had some work to do. He subsequently reached Boston just in time to be present at William H. Baldwin's funeral services.

We left shortly before nine o'clock and went to Hubbardston. The roads were so wet and slippery that I determined that it was not best to attempt the road via Shutesbury nor even to go to Templeton but to select what was generally reported to be the better road to Gardner. That road was none too good. It was slippery and very muddy and we got some decided jounces. There was a little rain from time to time but not enough to induce us to put up the top. Will and George went with me, and Frank with Prentiss.

We went from Gardner in the line of the railroad through Athol and Orange and Montague to the Connecticut River and then South to South Deerfield which we reached shortly before ten o'clock and where Mrs. Rosie Ahearn (nee Warren) gave us a good lunch in a private dining room at the Warren Inn. After lunch we read an account of the South Deerfield massacre at Bloody Brook and then went back half a mile and found the brook and the monument. Then, starting again South we went to North Amherst and through the grounds of the Amherst Agricultural College, then to Amherst and through the grounds of Amherst College and on to Northampton where Frank called at the office of his son Fred Wildes who went with him and the rest into and through the grounds of Smith College, it being Commencement season, <sup>where</sup> they also visited the green houses and botanical collections of Prof. Garong, while I walked over to the Whites and made a visitation call on them finding Mrs. White and Jean at home, Mr. White and Katherine being on their way from New York

to Northampton.

Leaving at about five we went through Florence and Williamsburg and Goshen to Ashfield, stopping on the way at the cemetery where George showed us the tombstone which marked *Darwin's* grave.

We reached the Ashfield Inn at about 6.30 and had a pleasant evening.

During the day there were some showers in the vicinity but we had no rain sufficient to cause us to put up the top. The afternoon was specially fine.

Distance travelled, 100 miles.

Saturday, June 12th. Frank Wildes joins me in taking a walk to the point known as Little Switzerland, starting at about six o'clock. It is about a mile and a half from the hotel to the point of view and we went perhaps a half mile beyond to a place where they are now clearing ground for a new reservoir for Ashfield. We got back to the hotel about quarter past seven and had a bath before breakfast and got started in our autos at 8.20.

We went down to the Deerfield River, crossing it just West of Shelburne Falls, and then up on the North side of the river through Charlemont and Zoar to the Hoosac Tunnel where we stopped to examine the mouth of the tunnel, and William took a picture of the same just as the locomotive of a passenger train was coming out.

Then we went up the road on the West bank of the river to Hartwellville, then down through Stamford to North Adams and then on to Williamstown which we reach at about half past twelve.

We had lunch at one and after lunch, under the guidance of the hotel proprietor, Mr. \_\_\_\_\_, we went up on to the piazza of the

Club House, which is just West of the hotel. A fine building with a view decidedly superior to that from Little Switzerland.

We then proceeded along the main street by the attractive club houses and college buildings, the church, where we examined the colored glass windows, one of which Dr. Kennedy assured us was designed by *Merrett*. Subsequently we found it was attributed to La Farge. Probably the border was by La Farge and the centre by

Frank went to the Treasurer's office to get some book containing pictures of the buildings and other college information and came back with the Treasurer of the College, Mr. \_\_\_\_\_, who showed us three libraries and other buildings and explained their history, including that of the ancient observatory. It was a pretty hot afternoon.

As we were walking back to the hotel we met Mr. Garrett Drovers, the Secretary of the Commerce & Industry Commission, who has lately been made Professor and who gave us further information in regard to the college and the various college buildings, and finally when we started about half past four rode down with us to the base ball field where Williams was having a game with the ~~College~~ <sup>University</sup> of Vermont. We staid there twenty minutes or so and then bidding him good bye we went on through Pittsfield to Lenox. The road to Pittsfield was fairly good though somewhat jouney in places and Burke was inclined to go too fast to suit Dr. Richardson.

On leaving Pittsfield Burke put on a spurt, the road being very perfect and we arrived at the Hotel Aspinwall in very short time, reaching there between half past six and seven. They gave us fine rooms up two flights, four of them connecting, and one being on the opposite side of the hallway. There were three bath rooms, each room having access to one of them.

We had a jolly dinner with champagne. We ordered Pommery Sec. but we got Pommery Brut. We were thinking that we were making a pretty good impression on the guests and on the waiters as well, when Will Richardson exploded our whole pretentions by ordering corned beef and cabbage. After dinner we sat on the piazza and enjoyed the music and all agreed that the orchestra of four or five pieces, including a piano, did excellent work.

Distance travelled, 96 miles.

Sunday, June 13th. The breakfast hour was eight o'clock but we did not sit down to breakfast until nearly half past eight, and Prentiss Cummings did not arrive until we had nearly finished.

William again showed how low-lived he was by ordering devilled pigs' feet and pork and beans.

Having secured a man to go with us to tell us the names of the owners of the different estates, we started out about ten o'clock for a survey of Lenox and its vicinity. My plan was to go to Stockbridge by one route, to return to Lenox by another, leaving our "valet de place" on the return, and then going back by the third route to the Red Lion Inn at Stockbridge. Fate, however, changed our plans.

When we reached the Westinghouse place I told our valet that as I knew Mr. Westinghouse I would venture going through his grounds. <sup>which incidently was not opened up for the family</sup> On approaching the house I came to the conclusion <sup>that</sup> it would be only the decent thing to leave my card, so the front door bell was rung, and after waiting a considerable time a maid appeared. I asked whether Mr. Westinghouse, senior, was in and to my great surprise she said "yes". So I sent in my card. Very soon I heard Mrs. Westinghouse's voice, "Why! it's Mr. Crocker." Whereat she appeared in elaborate morning dress. Her first inquiry was for Mrs. Crocker but finding that I was simply on an auto trip with some college friends she immediately announced that they must come in. I expostulated but she insisted and finally went to the door herself and invited them in. When we all got in and went into the parlor we discovered Mr. Westinghouse, junior, and his English bride, and a Mrs. Stone. We had a pleasant talk for a few minutes and then Mr. Westinghouse came in, he having been out on the grounds somewhere, and after a time I got up to go and Mrs. Westinghouse announced very positively that we must not go but we must stay there to lunch. Expostulations were of no avail and it was

finally decided that we were to take our trip to Stockbridge, as proposed, and take our lunch with them instead of at the Red Lion Inn. So, after going up into the observatory, &c., we started on our trip to Stockbridge, using my auto alone. With our valet the auto was just filled. As we were starting, Mr. Westinghouse said "I will go with you out to the gate", and he got in on the front seat and our "valet de place" took the seat on the step. As we neared the gateway I said to Mr. Westinghouse, "why do you not go with us to Stockbridge?". He cordially assented to the proposition, so we dismissed our "valet de place" and substituted Mr. Westinghouse for him. He then became the courier-in-chief of the party and I took a subordinate position.

We had a nice ride to Stockbridge and came back by the Curtisville Road.

Our trip had been arranged so that we should just reach the Westinghouse's at one o'clock, but when we were about two miles distant one of our front tires blew out with a report like a gun. Mr. Westinghouse immediately telephoned for his auto to come for him, and Burke made quick work of re-placing the tire. The result was that the tire was replaced and Mr. Westinghouse's auto arrived at the same minute. His auto had a limousine top and the machinery was manufactured by the French Westinghouse Company.

We were about twenty minutes late for lunch. We had a good lunch,-- sherry, champagne, and chops and strawberries and ice cream, and got started on our trip for Springfield a little before three o'clock.

All reports agreed that the Jacob's Ladder Road was practically impassable it being in process of relocation and reconstruction, and I could not learn of anybody who had been over the Blandford route. There was also a report that the road from Lee to Otis was in process of reconstruction and was practically impassable, but inquiries from

several persons led to the conclusion that it was the best route to take and we found it, in fact, in pretty good condition.

The clouds had been gradually gathering during the day and we had one or two light flurries of rain during the first part of the ride but it was not until we reached the height of land on the Blandford Road that steady rain set in and we had to put up the top.

We negotiated the steep descent on the North side of the hill successfully and went on a fairly good road towards Blandford. About two miles before reaching Blandford we came upon a party of automobilists standing in the road with their auto in the ditch at the side of the road. Our services were offered and accepted and we finally succeeded in pulling the auto back on to the road again. It led the way towards Blandford and had not gone more than an eighth of a mile before it came near getting ditched on the other side of the road. Fortunately for us, at a cross roads it turned out and let us pass and we proceeded without further incident through Blandford down the long four mile descent to Russell and then over the State Road to Springfield which we reached at quarter past six.

I stopped there and telephoned to Willis Rockwell, Manager of the Hazard Place at Enfield, and finding that preparations for our party were all properly made we proceeded ten miles to Enfield, reaching there a little before seven.

We found the Hazard Place very attractive, with large, well furnished rooms, and owing to the dampness of the afternoon we began our evening festivities with a cocktail. Our dinner was a good one, with little neck clams, soup, broiled lobster, roast duck with asparagus and green peas, salad, and ice cream with strawberries, crackers and cheese and coffee, and we also had a bottle of Sparkling Moselle. The day finished with a quiet smoke on the piazza and the discussion of many things of great importance.

Distance travelled 87 miles.

Monday, June 14th. In the morning the clouds looked like rain. We had breakfast shortly after eight and got started about 9.30. Just before leaving the house Will and George and I were decidedly startled by a section five feet square of the plastering falling with a great crash within about ten feet from us.

We gasped when the bill for our night's entertainment was presented, as it <sup>was</sup> considerably more than the bill at the Aspinwall. The place, however, had much of novelty and merit in it. The food was excellently cooked and served, and the little stammering "buttons" was decidedly interesting.

At Springfield we telegraphed home and then went on to Ludlow where we circled round through the buildings of the Ludlow Mfg. Co. and then on through Palmer and Warren and the Brookfields to Leicester which we reached at ten minutes of one. It was a hot morning but the speed of the car made sufficient breeze to keep us perfectly comfortable, a thin overcoat being on the whole desirable.

We had a good lunch at Leicester. We left at about half past two, and on the road passed Clark University and then we went on through Shrewsbury and Northboro and diverging to Southboro we stopped at the Sudbury Dam where the water flowing over the spillway makes an exceptionally beautiful waterfall. Here we were met by an engineer of the Metropolitan Water and Sewerage Board who had been sent there by Henry to meet us, and he opened the gate so that we were carried up to the level of the top of the dam thus getting a fine view both from below and above. After a half hour's stop we went on through Framingham to a point just East of the bridge crossing an arm of Cochituate Lake and then diverged to Natick and South Natick where we stopped to see the famous Eliot oak which is supposed to have been there at the time when Eliot was preaching to the Indians at that point somewhere about 1650. Then proceeding towards Boston we passed the several Hunnewell

estates and then went in our auto through the grounds of Wellesley College, and just beyond them in Wellesley we parted company, Will leaving my auto and going with Frank and Prentiss, and George Kennedy and I going by way of Needham and Dedham to Milton where I left George in charge of his wife and I proceeded home alone, reaching our house at Cohasset at twenty minutes of seven.

Distance travelled, 140 miles.

### Summary of the Trip.

In making the trip we went through the following cities and towns,- Boston, Brookline, Newton, Weston, Wayland, Sudbury, Maynard, Stow, Bolton, Lancaster, Clinton, Boylston, West Boylston, Stirling, Princeton, Hubbardston, South Gardner, Templeton, Phillipston, Athol, Orange, Erving, (Miller's Falls), Montague, (Turner's Falls), Deerfield, (South Deerfield), Sunderland, Amherst, Hadley, Northampton, Williamsburg, Goshen, Ashfield, Buckland, Charlemont, (Zoar), Rowe, Florida, Monroe, Readsboro, Vt., (Hartwellville), Stamford, Vt., Clarksburg, Mass., (Brigsville), North Adams, Williamstown, New Ashford, Lanesboro, Pittsfield, Lenox, Stockbridge, Lee, Becket, Otis, Blandford, Russell, Westfield, West Springfield, Springfield, Long Meadow, Enfield, Conn., Ludlow, Palmer, Warren, West Brookfield, Brookfield, Spencer, Leicester, Worcester, Shrewsbury, Northboro, Southboro, Framingham, Natick, Wellesley.

The distance which my auto travelled from Cohasset back to Cohasset was as follows:-

Thursday, June 10th,	100 miles
Friday, " 11th,	100 "
Saturday, " 12th,	96 "
Sunday, " 13th,	87 "
Monday, " 14th,	140 "
<hr/>	
Total,	523 miles

It is probable that the distance from Dr. Richardson's back to Dr. Richardson's was just about 500 miles.

The total expenses may be classified as follows:-

For gasoline (not including the original supply)	\$ 29.56
Hotel bills,	149.30
Fees,	13.30
	<hr/>
	192.16
Received from five, \$38.03 each,	\$190.15
" " H.H.S.	2.01
	<hr/>
	\$192.16

We visited or passed in view of the following educational institutions,- Amherst Agricultural College, Amherst College, Smith College, Williams College, Clark University, St. Mark's School, Southboro, Wellesley College.

We saw the Wachusett Dam and went around one side of the Wachusett Reservoir, and we also <sup>saw</sup> the dam of the Sudbury Reservoir with the water flowing over it. We crossed an arm of Lake Cochituate.

SUFFOLK COUNTY,

BOSTON, MASS.

March 1st, 1911.

Dr. George G. Kennedy,  
Readville, Mass.

Dear Sir:-

I am informed by Mr. George G. Crocker that you have kindly consented to be one of twenty to give \$50 a year for three years for a publication fund for the department of English of Harvard College. The fund is now complete and I am calling for the first year's payments. Will you please send me at your convenience your cheque for \$50?

I shall hand the first year's subscriptions over to the Corporation of Harvard College with a list of the donors, and you will receive notice from the Treasurer of Harvard College as to the date of payment for the remaining two years.

Thanking you for your kind interest and support in the matter,

I am,

Yours very truly,

A handwritten signature in cursive script, appearing to read "Robert Frost".

Subscriptions already made.

My dear George:

We are trying to get twenty subscribers to furnish each year for three years the sum of one thousand dollars (\$1000) for the purposes set forth in the enclosed report; in other words, fifty dollars (\$50) a year from each. If this appeals to you I should like to add your name to the list. If it doesn't, don't hesitate to say so.

Yours ever,

No. 7.

REPORT  
OF  
THE COMMITTEE ON ENGLISH LITERATURE  
AND  
THE COMMITTEE ON COMPOSITION AND  
RHETORIC.

TO THE BOARD OF OVERSEERS OF HARVARD COLLEGE:—

The Committee on English Literature and the Committee on Composition and Rhetoric, having met in joint session this year, together with the officers of the English Department who attended by invitation, make the following joint report of their conclusions.

The distinction between the work confided to the two committees is in practice not very clear. They are dealing with the same professors and instructors, and the latter are themselves teaching the students the canons of composition and rhetoric, together with a knowledge of English Literature. Reading and writing as studies are closely interwoven, and the work of the English Department as a whole may safely be referred to a single committee. We therefore recommend that a committee "On English," like the committees "On French" and "On German," be substituted hereafter for the two existing committees, believing that in this way a duplication of effort will be avoided, and the work of supervision and assistance be done more efficiently.

The professors of the Department of English have for some time deplored the lack of a publication fund for the perpetuation of notable theses for the Ph.D. degree, written by students in that Department. It is urged that the graduate and other advanced students of English comprise one of the largest and best trained bodies of productive scholars to be found in the English Department of any university. But the University has no fund to provide for the publication of the results of investigations by either instructors or students in the Department. The Department has in mind only scholarly productions such as are published the world over by subventions from universities,

academies, and other learned institutions. Your Committee has discussed this matter, and has decided to endeavor to raise the sum of \$1,000 yearly for three years, to be handed over to the Corporation for use by the Department of English in publishing such contributions, either by students or instructors of English, as may seem to merit preservation in permanent form. If the publications thus issued appear to justify this preliminary expenditure, it may seem advisable later to solicit a permanent fund for the Department, or one sufficient to provide for its pressing needs until such time as a publication fund covering all departments of the College is available.

Since the last report made by your Committee on English Literature, a rearrangement of the courses in English, resulting from a report made December, 1906, by a committee on revision from the Department of English, has been carried out, and is working successfully. The recommendations of this committee on revision have resulted in the following changes:—

1. The seven half-courses 32*a* to 32*b*, covering English Literature in successive periods from 1557 to 1892, have been discontinued, on the ground that they were substantially a reproduction of the instruction in English 28 (History and Development of English Literature in Outline), and so similar in character and method as hardly to warrant the amount of time spent by students who took more than two or three of them.

2. English 28 remains unchanged, but has been brought into closer relations with English Composition.

3. The seven half-courses above enumerated have been replaced by one full course, English 41 (primarily for undergraduates, but not open to Freshmen, or students who have taken English 28), which covers the history of English Literature from the beginning of the Elizabethan to the present time.

4. As it appeared that there were few courses of advanced character concerning English Literature since the Elizabethan period, the Department has established various new courses dealing with important authors (such as Johnson, Scott, Carlyle, and Tennyson) or with important phases of literature (such as the period of Dryden, the Essay, and the Romantic poets of the early Nineteenth Century).

5. The energies of the Department are also being especially directed to the development and maintenance of advanced courses (primarily for graduates), in order that the permanent offering of such courses by the University may be so copious and comprehensive as to invite constantly the attendance of scholars.

The attention of the Overseers is also called to the Department of Comparative Literature. Many of its courses are germane to the advanced courses in English Literature, and are given by professors of the English Department. These courses, which deal with the influences of the various European literatures upon one another, have greatly widened and enriched the field of study open both to undergraduates and graduates.

BOSTON, Feb. 24, 1913.

Dr. George G. Kennedy,  
Readville, Mass.

Dear George:

Woman's Suffrage was an old, old question when I was first in the Legislature forty years ago. In fact, in the days of Socrates, four hundred years B. C., the subject was so much discussed that Aristophanes wrote a comedy, from which it appears that then, as now, <sup>woman suffrage</sup> ~~it~~ and Socialism went together hand in hand. It is the present eagerness, activity, and growing strength of the Socialist party that has given to Woman's Suffrage this year unusual support, calling for extra exertions on the part of those opposed to these dangerous revolutionary follies.

Will you not join a few of us in providing funds for a proper presentation to the Legislature <sup>and the public</sup> of our side of this far-reaching question? As only a small portion of the community appreciates the seriousness of the present situation, and our appeal, therefore, must be made only to a few of our more thoughtful and discreet citizens, it is hoped that you will join with others in sending a subscription in the amount of \$100.

Yours very truly,

*George G. Crocker*

BOSTON, May 12, 1913.

Dr. George G. Kennedy,

Dear George:

I find that the Class Club postal gives but meagre information in regard to next Saturday's meeting. The plan is to start from Dr. Richardson's in my auto at twelve o'clock and go somewhere in the vicinity for lunch. After lunch take an auto observation trip, winding up at Cohasset for dinner at half past six or seven. I should like to have the fellows stay with me over Sunday, but they can come to Boston if necessary either Saturday evening by train, or on Sunday. I have plenty of rooms for each and all. I am sorry to say that Will tells me that he must come up on Sunday morning by the boat or train, either of which is due at about nine forty-five. There are lots of things that we can do on Sunday in which I feel sure you will be interested.

Please let me know what your plans are.

Yours very truly,

A handwritten signature in dark ink, appearing to read "G. U. Crocker", with a long, sweeping horizontal flourish extending to the right.

Brookline 17 June 1909

Dear Kennedy

I am sorry to say that I shall not be at your house Saturday, and saying that I am sorry does not express it. Partly for business and partly for other reasons I am going to visit a niece in Concord N. H. + she is to leave Concord for the summer Monday. So I cannot postpone the thing, I cannot do what I ought now and get back in season for the Club. You know I would not absent myself without adequate reason.

Very sincerely Yrs  
Prentiss Cummings

Paris Hill Maine  
25 Aug 1910

Dear George

I cannot find any name for the fence we were talking about except "string fence," and presume that was the technical name. In addition we used to have the "post & rail fence," the "stake fence," and the "brush fence," - the last being a kind of stake fence with brush or lopped trees instead of rails.

There is a common saying here "homely as hedge fence" - homely meaning ugly looking. We never had anything hereabouts called "hedge fence;" and the hedge fences of England are anything but ugly. Have you any idea how such a

2

phrase originated, or any  
dictionary that might tell?

They are at work on the  
library roof, & I have not got  
at any picture-taking of it yet.

Yrs  
Prentiss Cummings

Dr. Geo. G. Kennedy  
Readville

P. Cummings

Dear Prent. Mr A P W is a candidate for the  
office of accountant or auditing clerk  
for the Board of Selectmen of Brookline.  
He is a cousin of my widowed daughter  
husband so I have known him for some  
~~some years~~ <sup>my childhood</sup> Born in Brookline and a  
Harvard graduate of 1892 he has worked  
for many years with the Warren Asphalt  
Co of New York Mr Warren the senior partner  
being I believe a Brookline man  
~~of late years~~ ~~as~~ He has lately  
been obliged to seek a more indoor  
occupation ~~partly~~ ~~partly~~ on account  
of a slight knee trouble the ~~outdoor~~  
which has interfered somewhat  
with active exercise

I do not know the exact labors  
I should think him competent for the  
duties of the office and can recommend  
him as a faithful and honest ~~and~~ man  
and would be glad to know he met  
your approval and could have  
your support in his candidacy.

3 June 1909

Mr Prentiss Cummings

**EAGLE HOTEL**

CONCORD, N.H.

Concord, N.H. 13 July 1911

Dear George

I agreed to see you & Henry transported & Chassey on Saturday; but last night my niece's husband was in the automobile accident in which Senator Gallinger's son lost his life, & is at the hospital himself in very serious condition. To-morrow will bring a change that may give some indication of the issue. Anyway I shall be here several days & must be counted out of the Club dinner & preliminaries. I have written this to Crocker & Henry to make sure somebody heard in season for other arrangements.

My niece happened to be at my house, & we came up this morning.

Yrs

12 Aug 1913

Dear George

I shall not be at the Club  
Dinner this week, & think it a good  
idea for you & Henry to meet at your  
house.

The temperature here is quite  
cool enough for comfort, and once  
a month is all I can stand of  
Boston in the summer; & I shall  
only come for the Mt. Auburn meeting  
on the 27<sup>th</sup>.  
yrs faithfully,  
Frederic Sumner

THE OWL'S NEST  
PARIS, MAINE

13 Sept 1913

Dear George.

I wish you would look at the pamphlet you showed me about the land ownership in Great Britain, and see if it contains data of all the peerage including Ireland & Scotland. I find there was a publication in 1873 of two large volumes covering the complete land ownership which I shall get unless your compilation covers the peerage, - which is what I want. There has been no publication since; &

they do not seem to know of your  
abridgment in London. I presume  
I shall wish to borrow of you.

I am planning in a general  
way to be at the Club next Saturday.  
but perhaps cannot.

Yrs  
Prentiss Cunningham

Acsonet, Mass.,  
June 24<sup>th</sup> 1913.

Dear George: I was thinking of  
sending to Crocker just as the  
news of his sudden passing away  
came to me. Then I waited for  
commencement, thinking I might  
get a quiet chat with you, but  
somehow the time was more than  
usually occupied with me, and  
I have to depend upon the pen  
after all. Can I apply to you  
now, instead of the other George?

Just now I am in special  
need, but in future I hope to  
be able to ask for less. I have

been thinking and contriving for  
some time to see what I can  
do, for I do not want to seem  
to be presuming upon that kindness  
which has made my stay here so  
happy, and which I assure you  
I appreciate to the fullest degree.

It did me good to see you  
looking so well last week. I  
hope you felt as well as you  
seemed. I do not think you have  
appeared to be so well in a long  
time. I do not know yet just what  
my plans for vacation will be, but  
I am hoping that it will bring, among  
other things, the comfort and pleasure  
of seeing you face to face again at  
your lovely home. As ever,

Cordially Yours,  
Marsh.

June 27. 1913  
Sent him \$100  
Rev. Marshall M. Cutter.  
'64

Assonet, June 20<sup>th</sup> 1913.

My dear George:

Your favor  
of the 27<sup>th</sup> with enclosure duly  
received. Please accept my sincere  
thanks for both. You do not  
impress me as "old" yet,  
and I hope you will have

Many pleasant and delightful  
days as time goes on with  
us.

Cordially Yours,  
Marsh.

No. 38 Webster Street  
Brookline March 11<sup>th</sup> 1915

My dear George:

May I have the favor of another check? I am still here with Alice. The only change I have made is to go to Assonet on Friday instead of Saturday which I have done twice and shall keep it up. That gives me the chance to be at the Midwest Service. In a couple of weeks I shall take up the second Service on Sunday, if the people want it, and then I shall let things remain in statu quo until Spring has fairly settled. I weigh 156 lbs. "gymnasium style" and shall be.

perfectly content now to hold  
my own.

Alice sends her regards to Mother  
and yourself and of course I  
join. As ever

Cordially Yours  
Maud.

To.  
Mr. George G. Kennedy  
Readville

Assonet, Sept. 9<sup>th</sup> 1915.

My dear George:

I have been  
here since the 30<sup>th</sup> of July.  
I have had something of a  
vacation, by having the family  
come to me for four weeks  
in August. We were a  
bit cramped for room, but  
are used to saying so. They  
did the summer thing here  
in 1915. I had four train  
services with the Ocean Cruise

I am very glad, that you are  
 well, & hope you will continue so.  
 I have been thinking much lately  
 about the future of our country,  
 & how we can best preserve  
 our liberties & our rights.  
 It seems to me that the only way  
 to do this is by maintaining  
 our principles & our laws.  
 We must stand firm against  
 all attempts to undermine them.  
 Only in this way can we ensure  
 the happiness & freedom of  
 ourselves & our children.  
 I am, dear friend,  
 ever your sincere friend,  
 Wm. Lloyd Garrison

I am going to South America  
with my wife & children, and  
will be away for some time.  
I will be back in the fall.

I am writing this to  
 friends, and I would like  
 to tell you how much we  
 all love you. I hope you and yours  
 are very well. As ever,  
 Yours,

Cordially Yours  
Marsh

Assonet, November <sup>th</sup> 7, 1915

My dear George:

The well is getting dry again. Can you spare me a check, sending it to Brookline instead of here?

I hope to be up long enough to get over and see you.

I had the last of my vacation Oct. 20 to 30. I saved one of my Sundays so I could have it for the meeting of our National Council of Congl Churches at New Haven, Oct. 20-27. I had

been chosen as a delegate  
from our local association of  
churches. We had to "attend to  
business", but I had a good time.  
I came home by way of Boston  
to see Alice. It is likely to be the  
last meeting I shall attend, for I  
doubt if it gets back to New-  
England in ten years. The next  
meeting in 1917 is Los Angeles Cal.

I hope you and yours are  
well. As ever,

Cordially Yours,  
Mark

March 31 sent him  
check for \$100 and  
said I would have  
another ready for  
him on July 1, 1916

---

38 Webster Street  
Coolidge Corner, March 30/16.

My dear George:

Will you kindly  
send me another check? I don't  
expect to ask quite so soon, as  
I was relying on the Church  
payment. I found, on going  
to Assonet this week, that it was  
not convenient for them to settle  
up just now, so I am going  
to ask you to stand in the gap.

I hope I can get along without  
coming again too soon.

Best wishes to you and yours,  
Marsh.

38 Webster Street,  
Coolidge Corner,  
July 10<sup>th</sup> 1916

Dear George:

Thank you very much for the letter, and enclosure received this P.m. I have been expecting to see you since the month came in, and I may do it yet.

Alice has not been well for a fortnight.  
She is much better, but has not been  
out of doors yet. Give my best regards  
to Mildred. I hope you are feeling  
all right this queer season.

Cordially yours,

Maud.
